## ARCH 3: Lovstrom locale

<http://archives.brandonu.ca/en/permalink/descriptions12406>

Part Of: RG 7 Beverley Nicholson fonds  
Description Level: Series  
Series Number: 3  
Accession Number: 1-2010  
GMD: multiple media  
Date Range: 1985 to 1991

### History /

#### Biographical:

The Lovstrom locale first came to the attention of Dr. Nicholson through conversations with landowners Mr. and Mrs. Herb Lovstrom in 1985. Lovstrom is a multi-component archaeological locale located 25km south of Brandon overlooking the Souris River channel. The landowner's surface collection and the presence of bone and artifacts in a cultivated field indicated the presence of one or more sites.

Limited testing was conducted in 1985 and 1986, followed by major excavations in 1987, 1988 and 1991. Eight sites of block excavations with a total of 132 1m<sup>2</sup> excavation units were completed. The locale area extends approximately 500m north from the edge of the Souris Valley escarpment and over 200m east from the Jock's Creek escarpment.

Physical and biological environment As has been noted above, the locale is bounded on the south by the Souris channel and on the west by the incised channel of Jock's Creek and a till plain extends to the north and the east. This plain is characterized by buff colored glacial till with numerous rocks embedded in the surface. Surrounding these rocky knolls are dark-soil hollows where the various cultural occupations are found. The depth of the topsoil layer suggests a long term grassland cover with the present oak forest likely developing in historic times due to the elimination of bison grazing and the controlling of prairie fires in late historic times. A small cleared patch of farmland is found within the boundaries of the locale area. This area has provided a substantial surface collection of artifacts.

Present vegetation in the area is a mosaic of aspen/oak forest groves and mesic grass prairie that includes introduced species such as brome grass. In poorly drained areas, willow and red osier dogwood are present. The Lovstrom locale is found in a forested area dominated by oak with an under story of saskatoon, chokecherry, pin cherry, and hazelnut brush. Poison ivy is abundant as well as sarsaparilla.

The major faunal resources in Precontact times would have been bison, with elk and mule deer playing a minor role. Antelope may have been present also. Small animals included snowshoe hare, cottontails, porcupines and beaver. Canids, including wolf, coyote, fox and domesticated dog were present, as well as mustelids such as badger, mink, and weasel. Fragments from a fisher were also recovered in the excavations.

#### Summation.

The Lovstrom locale has eight sites. The sites were designated and excavated as Blocks A, B, C, D, E, F, G and H. Many of the sites are multi-occupations.

The Vickers materials are primarily confined to Blocks D, E, F, G and H. Vickers Focus materials overlie Blackduck/Duck Bay materials. Blackduck and Duck Bay materials are found in the lower levels of all excavation blocks and in most test units. The Vickers occupations at the Lovstrom locale, based upon ceramic wares and an overlapping of C14 dates, appear to have been contemporary with the Lowton type site to the east, near Belmont. A small protohistoric occupation was identified overlying part of Block D. Faunal remains are abundant with bison clearly dominating the assemblages. Lesser amounts of canid are present as well as small mammals including beaver, hare and mustelids. Small amounts of avian species are

also present.

## BC 3: Office of the bursar

<http://archives.brandonu.ca/en/permalink/descriptions4245>

Part Of: RG 1 Brandon College fonds  
Description Level: Series  
Series Number: 3  
GMD: textual records  
Date Range: 1910-1967  
Physical Description: 2.03 m

History /

Biographical:

The Office of the Bursar was created in 1910. As head of financial affairs, a Bursar was more compatible to the administrative framework of other universities in Canada. The initial duties of the Bursar were the collection of all fees, control of funds and disbursements, donations, purchasing, supervision of grounds, and progressive measures in the investment of funds and the enlargement of finances. By 1913, the Bursar was also in charge of the book department, boarding, grounds and gardens, buildings and heating plant.

By 1924, the Bursar had become so involved in the management of College affairs that the Board established a committee to examine the functions of the President and the Bursar "with a view to readjustment for efficiency." The committee presented its report later that year, clearly defining nine functions of the Bursar. These functions were the keeping of books, banking, general handling of student fees and accounts, general handling of all trade accounts, handling of maintenance and extension movement pledge cards and receipts, general responsibility for the purchase of all supplies, supervision of fireman and janitor, supervision of buildings and grounds and the submission of a monthly report to the Secretary of the Executive. In 1929, the Bursar took on the role of Secretary to the Executive.

At several times during the history of Brandon College the Bursar and the Registrar were combined into one job.
