Crepeele locale Radiocarbon Dates

<http://archives.brandonu.ca/en/permalink/descriptions11966>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 1.5

Accession Number: 1-2010

GMD: textual records

Date Range: 2003-2008

Material Details: Radiocarbon date reports have been scanned in multi-page PDF files.

History /

Biographical:

The Crepeelee locale is located within the larger Lauder Sandhills area, located in southwestern Manitoba. The area is a complex region of high biodiversity made up of stabilized sand dunes and wetlands that encourage the development of mixed forest and grass prairie. This area provided a variety of subsistence resources for pre-European hunter-gatherers. At the present time the grass prairie is now farm land but the areas of vegetated sand dunes have not been cultivated and have revealed numerous pre-contact archaeological sites.

Archaeological surveying was conducted in 2003. The results of the 2003 Casselman survey showed over 300 test units contained cultural material and indicated several areas for further examination including the Crepeelee site DiMe-29, Sarah site DiMe-28 and Graham sites DiMe-30.

From 2003 to 2008 field work took place at the locale with 75 - 1m x1m units excavated. The Crepeelee locale is a complex region of high biodiversity made up of stabilized sand dunes and wetlands that encourage the development of mixed forest and grass prairie. This area provided a variety of subsistence resources for pre-European hunter-gatherers. At the present time the grass prairie is now farm land but the areas of vegetated sand dunes have not been cultivated and have revealed numerous pre-contact archaeological sites.

To help establish the cultural sequence at the locale Radiocarbon dates were obtained from the three sites in the Crepeelee locale.

Radiocarbon dating

The technique of radiocarbon dating was developed by Willard Libby and his colleagues at the University of Chicago in 1949.

Radiocarbon dating is used to estimate the age of organic remains from archaeological sites. Organic matter has a radioactive form of carbon (C14) that begins to decay upon death. C14 decays at a steady, known rate of a half life of 5,730 years. The technique is useful for material up to 50,000 years. Fluctuations of C14 in the atmosphere can affect results so dates are calibrated against dendrochronology. Radiocarbon dates are calibrated to calendar years.

Dates are reported in radiocarbon years or Before Present. Before Present refers to dates before 1950. The introduction of massive amounts of C14, due to atomic bomb and surface testing of atomic weapons, has widely increased the standard deviation on all dates after A.D. 1700 causing these dates to be unreliable.

Accelerated mass spectrometry can more accurately measure C14 with smaller samples and can date materials to 80,000 years.

Material Details: Radiocarbon date reports have been scanned in multi-page PDF files.

History /

Biographical:

The North Lauder locale has a long archaeological and geological history that is important for understanding the forces that shaped the region. Archaeological research in the locale shows that the area has been occupied by humans for at least the past 6,500 years. Environmental forces provided an area of diverse resources that attracted early peoples.

Archaeologists from Brandon University have been conducting research in the North Lauder locale that has focused on the Atkinson site, a 6,500 year old hunter-gatherer site and Flintstone Hill.

The geomorphology of the glacial Lake Hind Basin over the past 11,000 years is known primarily through the study of a cut bank along the Souris River. Flintstone Hill contains the most complete stratigraphic record for the post-glacial period on the northern plains. The site has been extensively studied by geoarchaeologists, geologists and paleoenvironmentalists over many years and their findings have contributed to our understanding of the region.

Radiocarbon dates were obtained from the Atkinson site and Flintstone Hill.

History /

Biographical:

The Pool livestock advisory boards and livestock markets were organized under the MPE when MPE merged with the Manitoba Co-operative Livestock Producers Ltd in 1948. The livestock pools operated in much the same way the grain pools did. The MPE Livestock Division was overseen by the Canadian Livestock Co-operative (Western) Limited (known as the C.L.C.). Local shipping associations shipped livestock to a central selling agency in St. Boniface, although this changed with the development of the rural highway system in Manitoba and the founding of Pool Packers.

Part Of: Fred McGuinness collection

Description Level: Sub-series

Series Number: McG 6.2

Accession Number: 1-2015

GMD: textual records

Date Range: c. 1980s - 1990s

Physical Description: Approximately 6 cm of textual records

History /

Biographical:

Fred McGuinness was a sessional lecturer in the English Department at Brandon University in Brandon, Manitoba where he co-taught an introductory undergraduate course in journalism with English Professor John Blaikie. Although McGuinness had 30 years experience as a journalist, editor, publisher, and freelance writer, as well as an extensive public speaking career, the partnering was necessary because he did not have a graduate degree, a qualification necessary for teaching in a university setting. In addition to his professional experience, McGuinness was also an avid reader on topics about the process of writing and the publishing of popular writing.

McGuinness likely began teaching his journalism course at Brandon University in 1983 and continued until 1990, possibly 1996. McGuinness often referenced his class when writing his Neighborly News column. A portion of McGuinness' course involved analyzing and debating current events from newspaper headlines. McGuinness emphasized the importance of clean copy, spelling, and grammar with his editing assignments.

Custodial History:

Accession 1-2015 contains records created and collected over the course of McGuinness' career as a newspaper journalist, freelance writer, and sessional instructor. The Estate of Fred McGuinness donated the materials to the SJ McKee Archives circa 2011. The Archives accessioned the records in 2015.

Scope and Content:

The subseries contains records created and collected by Fred McGuinness during his time as a sessional instructor and writer. Consisting of teaching materials McGuinness used in the undergraduate course he taught with Professor John Blaikie the subseries includes: lecture notes, quizzes, exercises, exams, and newspaper and magazine articles.

Notes: Information for the history/biography was obtained from documents in the BU journalism course subseries (McG 6.2), and his Neighborly News columns (McG 2.3)

Accruals: Closed

Finding Aid: A file level inventory is available

Storage Location: 2015 accessions

Related Material: Fred McGuinness would write/publish about a topic in a number of forums. Therefore, it is possible materials pertaining to his teaching career may be found in other subseries of the Fred McGuinness collection. Several articles McGuinness wrote for Neighborly News referenced his BU journalism students (see McG 2.3)
