### History /

#### Biographical:

Brandon College established a Canadian Officer Training Corps (COTC) program in 1916 and had enough students for a platoon that would join the 196th Western Universities Battalion's B Company. COTC logs for in the SJ McKee Archives show that at least 40 men regularly attended classes on campus during the 1916 winter term.

The Brandon Daily Sun published the names of 60 potential platoon recruits before they headed to Camp Hughes to train in the summer of 1916. Although Lt. J.R.C. Evans spearheaded the training of the COTC enlistees at Brandon College, he was found medically unfit for overseas service. In his stead, the son of the college's founder, Lt. William Carey McKee, lead the platoon to Camp Hughes where they joined the 196th Battalion. Of the 60 recruits identified in the local paper, 20 would not survive the war, including Lt. McKee. [ST/2016]

#### Scope and Content:

Photograph shows a group of 40 men wearing WWI uniforms. The men have the Canada general service cap badge on their headdress. The officer in the centre of the group (i.e., the man with the cane) is J.R.C. Evans. ## Suffield explosion - waiting

History /

Biographical:

Suffield, Alberta, is situated approximately 40km northwest of Medicine Hat, Alberta. A few "large explosive events" (100 to 500 tons) were conducted at the Defence Research Board's (DRB) Suffield Experimental Station in the 1960s. On 19 January 1961, Medicine Hat citizens felt tremors in the community as a result of five tons of TNT being detonated at the station. The station director attributed this anomaly to freak atmospheric and weather conditions. At the time the DRB was testing the effects of shock waves on military equipment.

In July 1964, the Suffield Experimental Station detonated 30,600 blocks of TNT - 500 tons - to test the largest, non-nuclear, non-confined, surface blast. Placed in various sections radiating from ground zero to test the effects of the blast were targets, dummy-men, miscellaneous instruments, mines, model ships, nose cones, respirators, vehicles, subterranean chambers, shelters, tunnels, foxholes, and trenches. Several hundred people were expected to observe the blast, including 80 "official observers" and a VIP party of military and research personnel from Canada, the United States, and Britain.
