Lovstrom Block F - Ian Kuijt field journal

<http://archives.brandonu.ca/en/permalink/descriptions12636>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: File

Series Number: 3.7.1.2

File Number: 1

Accession Number: 1-2010

GMD: textual records

Date Range: 1988

Physical Description: 35 pp.

Material Details: PDF

History /

Biographical:

Ian Kuijt was crew chief at the Lovstrom locale excavations in 1988. Pages 8-9 relate to Block F.

Scope and Content:

Record of excavation methods, items recovered, features, local environment and weather noted by teaching assistant.

Name Access: Lovstrom Block F - Ian Kuijt field journal

Subject Access: Archaeology
Lovstrom locale

Lovstrom Block H - summary

<http://archives.brandonu.ca/en/permalink/descriptions12638>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.9

Accession Number: 1-2010

GMD: multiple media

Date Range: 1988 - 1991

History /

Biographical:

The vegetation in block H is similar to other areas in the locale with an open oak forest with a light understory of saskatoon, hazelnut, poison ivy and sarsaparilla.

The excavations of the eight 1m² units in 1988 resulted in the recovery of over 650 ceramic fragments including 20 rim sherds from at least four vessels, a grooved maul, fire-cracked rock, lithic debitage and a reworked Avonlea projectile point. A large amount of bison bone, including a number of axial elements and a fragmented skull were also recovered.

Based on the 1988 recoveries at the site further excavations took place in 1991. Nine excavation units were opened next to the previous excavations. Another 250 ceramic sherds were recovered in 1991. Nine vessels have been identified based on rim sherds. Vickers Focus and Woodland vessels have been identified and two vessels similar to Scattered Village Complex were recovered.

The lithic material assemblage is intermediate between Blocks G and E with KRF being the most frequent material category followed by local cherts.

Two features, a hearth and a curvilinear arrangement of rock were recovered. The high numbers of ceramic fragments suggests a habitation area, rather than hunting or butchering behavior. However, the separation of occupations at the site is difficult to establish and there may be different uses of the site by successive occupations.

Radiocarbon dates from this block indicate two occupations separated in time by some 300 years. XU 181 – 405/110 BP and XU 184 – 780/110 BP.

Scope and Content:

Sub-series has been divided into sub sub series including: Lovstrom Block H 1988 and Lovstrom Block H 1991.

The MacNeill teaching controversy

<http://archives.brandonu.ca/en/permalink/descriptions12736>

Part Of: RG 1 Brandon College fonds
Description Level: File
Series Number: 6.1
File Number: 2
Other Numbers: RG 81-30, Series 1, Subseries 4B, 1921-1925, Box 2, File 2
GMD: textual records
Date Range: 1921-1922
Physical Description: 1 file
History /
Biographical:

Dr. MacNeill was the central figure in the scandal involving Brandon College in the early 1920's. The Fundamentalist Baptists accused Brandon College, and Dr. MacNeill especially, of teaching Modernist views. He was absolved of any charges at the 1924 Baptist Convention in Chicago.

For history/bio information for H.L. MacNeill, see RG 1 Brandon College fonds, BC 6: Office of the college dean.

Scope and Content:

File consists of correspondence to Howard Whidden, President of Brandon College, and various regarding Dr. MacNeill and his teachings (October 1921 - January 1922). It also contains a copy of "An Abstract of the Report of the Brandon College Commission" prepared by Rev. H.H. Bingham regarding Dr. MacNeill and his teachings.

Graham site 2008 - Andrew Lints field journal

<http://archives.brandonu.ca/en/permalink/descriptions11810>

Part Of:	RG 7 Beverley Nicholson fonds
Description Level:	File
Series Number:	1.4.4.2
File Number:	2
Accession Number:	1-2010
GMD:	multiple media
Date Range:	2008
Physical Description:	13 pages
Material Details:	Field journals have been scanned in multi-page PDF files.

History /

Biographical:

In 2008 Brandon University Archaeology returned to the Crepeelee locale to conduct further testing at the Graham and Crepeelee sites. Four units (XU 47-49 & 53) were excavated at Graham 2008 in order to collect samples and add further data to previous excavations. The usual excavation methodology was employed.

The small crew was directed by Bev Nicholson with Crew of Bill Foy, Andrew Lints & Kim Harrison

Recoveries included faunal (mostly bison), lithics and ceramics.

The field journals contain information about both the Crepeelee and Graham sites 2008.

Scope and Content:

Record of daily observations at the site including: excavation methods, items recovered, features, local environment and weather.

Sarah site DiMe-28

<http://archives.brandonu.ca/en/permalink/descriptions11829>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 1.3

Accession Number: 1-2010

GMD: multiple media

Date Range: 2003-2004

History /

Biographical:

The Sarah site was chosen for excavation based on the results of the Casselman survey. The survey recovered significant amounts of faunal remains, some ceramics and lithics from the test pits. Excavations took place in 2003 at Crepeelee West (Units 1-5) and Crepeelee East (Units 6-9). The site was subsequently renamed the Sarah site DiMe-28. In 2004 another 9 units were excavated (Units 10-18).

Based on the recoveries it was determined that the Sarah site is a stratified site with woodland ceramics in the upper occupation and late woodland points in both of the upper occupations. These upper occupations produced abundant bison bone including foetal bone. The lower occupations produced less bone and no foetal bone, although absence of foetal bone in the lower occupations does not necessarily indicate a warm season occupation. This could be due to sample error or peritoxic factors such as scavenging of the fragile bone by dogs or other carnivores.

The dates from the Sarah site include 550+/-40 B.P.; 1430+/-80 B.P.; 2810+/-80 B.P.; 3120+/-130 B.P. The lower occupations did not yield any diagnostic materials although debitage was abundant. These occupations were most productive at the edge of the large sand dune at the southern edge of the excavations. It is assumed that the major portion of these occupations have been overridden by the dune in the past 3000 years. Heavy earthmoving equipment would be required to remove this overburden which limits the possibility of future excavation.

Environment

The Sarah site is a large area located at the eastern end of the Crepeelee locale. Ground cover is a mosaic of aspen poplar groves and patches of mesic grass prairie. Excavation profiles indicate that this has been the situation since early precontact times, although as local climatic conditions change (primarily rainfall), the relative size of these areas and where they may have occurred also changed. The soil is aeolian sand sheet derived from delta outwash deposits along the western edge of glacial Lake Hind. The present topography is a variable dune landscape reworked by aeolian activity that creates a mosaic of microhabitats. These include forested patches in the lee of sand dunes with grassland on the southern and western exposures and small damp lowlands that support balsam poplar, willows, red osier dogwood, high-bush cranberry and water birch. There is no permanent water source in the area although a small seasonal stream meanders through a damp lowland to the east of the Sarah site.
