History /

Biographical:

The Graham site was initially designated as a separate site early in the testing of the Crepeele locale due to what appeared to be a distinction between Early and Late Woodland ceramics. Subsequent testing has shown that this distinction was premature and that the cultural mosaic represented in the western section of the Crepeele locale does not readily separate in this manner.

3.1.1.1.1 Summary Information

In 1985 Drs. Nicholson and Scott Hamilton with a small crew of students set up survey lines within the locale. Surface data were designated as catalogue Surface 1 and Surface 2 with consecutive artifact numbers. Five test units were excavated in the non-cultivated area of the locale.

The initial dataset was established as PDF with the base of 200 0000 and 200000. A subsequent dataset with the co-ordinates of 00000000 was used to facilitate computer cataloguing.
