## Lawrence Stuckey photograph collection - Brandon history

<http://archives.brandonu.ca/en/permalink/descriptions9030>

Part Of: RG 11 Lawrence Stuckey fonds

Creator: Many of the images presented were captured by Mr. Stuckey himself. However being a well known and accomplished photographer and amateur historian, he also bought, sold and traded negatives with other collectors. Therefore the viewer is reminded that many images, although part of his collection, were created and/or provided for Mr. Stuckey by other collectors. In addition, it is believed that some images contained within his collection were created by photographing a pre-existing negative or print. We have attempted to note the authorship of all images when possible.

History /

Biographical:

For history/bio information see the collection level description of the Lawrence Stuckey collection.

Custodial History:

For custodial history see the collection level description of the Lawrence Stuckey collection.

Scope and Content:

This sub-series consists of photographic negatives related to the history of Brandon, Manitoba.

All of the images contained within this sub-series were part of Mr. Stuckey's lifelong personal collection of photographic negatives and prints. Images include those related to people, street scenes, buildings, various city departments and so forth.

Notes:

All of the images from Mr. Stuckey's collection of negatives and prints were reproduced and digitized using an Epson scanner and software suite. All attempts have been made to reproduce the images in such a manner that balances our desire to portray the negatives and photographs as they originally appear, with the need to create an optimal digital image for viewing. Therefore it is noted that minor alterations to image size and contrast have occurred.

With few exceptions, all digitizing and database entry of images and descriptions was conducted during the summer of 2009 at Brandon University by Patrick Elves.

Repro Restriction: The McKee Archives is the copyright holder for the Stuckey materials.

Storage Location:      Lawrence Stuckey collection

Arrangement:

Unless otherwise noted, the arrangement of these images was drawn from the original classification scheme used by Mr. Stuckey.

The information specific to each image, for the most part, was gained from Mr. Stuckey's personal notes regarding that particular photograph or similar photograph. Observations or notes contained within square brackets are explanatory or missing materials that have been added by someone other than Mr. Stuckey.

We have attempted to present the information that accompanies each image in the same format as was used by Mr. Stuckey himself.

Lindsay attended Park School, Earl Oxford Junior High School and Brandon Collegiate. In September 1943, he entered 2nd Year at Brandon College, joining the Class of 1946. Due to past experience in publishing the BCI yearbook, he was drafted into The Board of Publications and named Co-editor of the Quill along with third year student Genevieve Fuloski. Lindsay and Fuloski held their positions for two years. Because of the war, money and supplies were in short supply and the Quill at one point was reduced to mimeographed pages. While Editor Lindsay wrote The eggshell-Slightly Cracked column.

Lindsay was named Senior Stick in 1945 and graduated from Brandon College with a B.Sc. in 1946. He obtained both his MSc (1948) and PhD (1951) in Physical Chemistry from McMaster University.

During his time in Hamilton, Lindsay met Shirley Woolmer and the couple married on September 2, 1950. They moved to Arvida, Quebec in 1951 where Lindsay accepted an offer from Aluminium Laboratories Limited, the research arm of Alcan Aluminium Ltd. The couple remained in Arvida for twenty-two years, during which time they had four children: Sharon, Heather, Geoffrey and David.

In 1973, Lindsay was transferred to Alcan's head office in Montreal where he spent the next three years co-ordinating alumina research in Alcan plants around the world. In 1976, he accepted a transfer to Alcan Jamaica as Chief Technical Officer and Manager of Technical Development. He and Shirley spent nearly eight years in Jamaica before returning to Canada in 1984. After a year at Alcan's Research Centre in Kingston, ON Lindsay took early retirement.

During their years in Jamaica Lindsay had been introduced to Rotary and he continued his association with the organization in Kingston where for fifteen years he was Bulletin editor of the Kingston-Frontenac Rotary Club. In addition to Rotary, Lindsay (along with his wife) took up genealogy in his retirement and after fifteen years of extensive travel and research he became his Lindsay family's historian and author of *The Lindsays of Dundonald*.

For three years in the late 1980s Lindsay served as a representative on the Brandon University Alumni Executive for Eastern Canada. Along with his wife he attended two class reunions at Brandon University including his 50th Re-convocation in 1996.

## History /

### Biographical:

Thomas Russell Wilkins was born in Toronto in 1891. He received his B.A. from McMaster University in 1912, and became the Science Master at Woodstock College the following year. In 1916, he and his wife Olive moved to Chicago, where Wilkins was an instructor of Physics at the University of Chicago. The next year he served as a master signal electrician in the U.S. Signal Corps. During World War I, Wilkins completed pioneer research for the United States Navy, which led to the development of pulse sonar devices in the 1920s. He had also been researching the possibilities of a wireless telephone.

Wilkins and his wife moved to Brandon in 1918, where he took up the position of Professor of Physics. During his time at Brandon College, Wilkins introduced the latest technology to classrooms, designed the original Science Building, and along with the Brandon Citizen's Committee, secured building funds for the Citizen's Science Building.

Receiving his Ph.D. from the University of Chicago in 1921, Wilkins resigned from Brandon College in 1925 to pursue postgraduate study at Cambridge University. In 1926, he began research at the University of Rochester, where he also took up the position of Professor of Physics. From 1930 to 1938, he acted as the Director of the Institute of Optics.

Widely known for his work in the fields of cosmic rays and atomic disintegration, in April 1939, Wilkins announced the perfection of a camera that was able to record the "footprints" of invisible atoms after they collide. In October 1939, he received a medal from the Royal Photographic Society of Great Britain recognizing his work regarding the use of photographic emulsions in the study of radium. The following year, Wilkins perfected a camera that could determine the energy levels inside the nuclei of stable chemical elements. He received a grant from Sigma Xi, the National Society for the Promotion of Scientific Research, in November of 1940.

Wilkins married twice. The first marriage, to Olive Angles Cross took place on June 17, 1913. Olive Wilkins died suddenly on May 13, 1937, at the age of 45. Wilkins married Susan Gwendolyn Whidden, the daughter of former Brandon College president Dr. H.P. Whidden, in 1938.

Thomas Russell Wilkins died suddenly of a heart attack on December 10, 1940, on his way back to his laboratory after a faculty meeting. He was 49 years old.

### Custodial History:

Records were accessioned by the McKee Archives in 1998. Prior custodial history is unknown.

### Scope and Content:

T. Russell Wilkins' records contain correspondence between himself and Mrs. Wilkins and Dr. Whidden concerning their employment with Brandon College. There are letters between the two men regarding the building of the Science Building in 1920. There is also a copy of the Canadian Baptist. Besides programmes and a picture, there is also correspondence between various people. Dr. Wilkins kept the papers he had written for various classes at McMaster University in the years 1911 and 1912. There is a "toast to the ladies" that he delivered at a banquet of some sort, that gives an interesting view on how Wilkins, and possibly other men of his time, viewed women. There are numerous newspaper clippings, and several pages taken from journals such as Popular Mechanics, Popular Electricity and others. Dr. Wilkins was at the top of his field of study. He was an extremely bright man who managed to create some very useful tools of science. His papers are interesting and informative to read.
