History /

Biographical:

Laurence Overton "Laurie" East was born in the municipality of Odanah on the west half of 29-13-18, on March 13, 1911. He attended Tremaine and Roseneath schools and worked on the family farm, eventually leaving school to work due to his father's ill health and then taking over the operation in 1936, after his father died. Laurie retired from farming in 1976. Laurie married Bernice McDonald (1916-2006), a teacher, on July 4, 1942. They had no children. Laurie's hobbies were music, dancing and travel; he took part in local entertainment and taught square dancing classes. He was a member of the Hunterville United Church, serving on the board and volunteering as Sunday School Superintendent or teacher. In the 1940s, Laurie was part of local committees to secure telephone and postal service. From 1970-1983, he was a member of Elton Municipal Council. Shortly after joining the council, Laurie was appointed as a representative to the library board; he joined representatives from Minnedosa and Minto councils, as there was support in the region for the organization and establishment of a regional library. Laurie East died on April 18, 2003 in Brandon, MB and is buried at the Rapid City Cemetery.

North Lauder Radiocarbon Date report by Beta Analytic Inc. for Flintstone Hill #109900.

Radiocarbon dating

The technique of radiocarbon dating was developed by Willard Libby and his colleagues at the University of Chicago in 1949.

Radiocarbon dating is used to estimate the age of organic remains from archaeological sites. Organic matter has a radioactive form of carbon (C14) that begins to decay upon death. C14 decays at a steady, known rate of a half life of 5,730 years. The technique is useful for material up to 50,000 years. Fluctuations of C14 in the atmosphere can affect results so dates are calibrated against dendrochronology. Radiocarbon dates are calibrated to calendar years.

Dates are reported in radiocarbon years or Before Present. Before Present refers to dates before 1950. The introduction of massive amounts of C 14, due to atomic bomb and surface testing of atomic weapons, has widely increased the standard deviation on all dates after A.D. 1700 causing these dates to be unreliable.

Accelerated mass spectrometry can more accurately measure C 14 with smaller samples and can date materials to 80,000 years.

Scope and Content:

Sub sub series contains radiocarbon dates from: Atkinson site and Flintstone Hill.

The Pride Team was tasked with collecting and synthesizing exhibition documents and other materials in city, provincial, and federal records spanning 100 years. Many local newspapers and committee minutes were consulted.

The authors cover 103 years of Brandon Fair history, starting with the first fair in 1882 followed by the development of other agricultural fairs and exhibitions in Brandon, specifically The Royal Manitoba Winter Fair, The Provincial Exhibition of Manitoba, and the Ag-Ex livestock show.
