History /

Biographical:

Brandon Sand & Brick Co. was better known as "Samson's Brick" for owner-proprietor Samson.

Plant located at 29th Street & Princess Avenue; Offices located in Smith Block.

Used Huennekes (German) system, whereby dried sand was mixed and ground with lime in a tube mill as water was added to slake the lime. The mixture was formed into bricks in a press, then steamed in a cylinder 6 ft. in diameter and 62 ft. long for 10 hours, under pressure of 120 psi, to form a compound like cement. Bricks were ready for use when taken from cylinder. (Ritchie, T. Canada Builds. pp. 219)

In addition to the Belvedere Apartments, many houses are faced with this brick. The rear of the 9th St. MTS building and others downtown buildings were also formed of it. Also used in interior walls of Prince Edward Hotel, Alexander School and many other buildings that were faced with more expensive brick. The product was so good, the plant's demise was likely caused by the post-WWI depression.(LAS)
