Scope and Content:

CPR Ice House Fire with engine 701

Notes:

This large ice house, located between the CPR tracks and Assiniboine Avenue at 3rd Street, was filled with blocks of ice from the Assiniboine River each winter. It had a long high platform for [loading ice blocks into] refrigerator cars, and also handled charcoal braziers for heating these same cars in winter. The new ice house structure that was built after this fire was much smaller, as it had an artificial ice plant.

With mechanically temperature-controlled cars replacing ice-cooled refrigerators, it was demolished in the 1970's.

This photograph shows how steam switch engines were used as fire engines. A hose carried in a box under the tender was fitted into a branch of the boiler feed pipe (discharge pipe). When the injector was turned on it gave a nozzle pressure of over 200 psi.

### History /

#### Biographical:

This bridge was condemned in the late 1930s but cyclists continued to use it until it was torn down (approximately 1940)

Until the early 1920s the Canadian Pacific Railway maintained a well and pumping station near the southeast corner of this bridge, which pumped water through a pipeline to a locomotive watering tank at Kemnay.
