The artist is a recipient of many Canada Council and Ontario Arts Council Awards. His work is included in the collections of Canadian Art Bank, National Library of Canada, Canadian Museum of Contemporary Photography. (Art Gallery of Southwestern Manitoba)
Description:	From 'Excerpts from a conversation with Frank Pimentel': "There are people I've photographed consistently over the years. They look a little different - they've changed. You can see something that's happened over time, and I almost have a series of certain people because I've photographed them so much..I think the restaurant is a place that hasn't been able to keep up with the way the world has changed, like at a certain point the people decided that it was time to give up. When I look at the work that I've done it makes sense that I've left the gaps that I have because I'm trying to say something about the place and the people, that the place itself relates to these people and the objects there just seem to - I guess the word is pathetic - they're worn. I get a sense that the people have given up and they are just going through time and they're not going to get any better.." (from Photo Communiqué).

History /

Biographical:

The Sarah site was initially chosen for excavation based on the results of the Casselman survey. The survey recovered significant amounts of faunal remains, some ceramics and lithics from the test pits. Excavations took place in 2003 at Crepeele West (Units 1-5) and Crepeele East (Units 6-9). The site was subsequently renamed the Sarah site DiMe-28.

Units 1 to 9 were excavated by supervisor James Graham and crew of Sarah Graham, Mike Evans, Todd Kristensen, Shayne Kolesar, Lisa Sonnenburg and Emily Ansell.

Scope and Content:

Sub-sub-sub series contains: Summary information of field methodology, number and co-ordinates of excavations, personnel and their staff position.

1.3.1.1 Summary Information

Sarah Site DiMe-28

The Sarah site was originally Crepeele West (SW 1/4 - 2) and Crepeele East (SE 1/4) when recorded in 2003. The datum point of 5850420N was used for the survey and also used for the excavations. A local datum of 5850420N was then established for the site and given the co-ordinates of 5850420N.

Excavation Units: SW 1/4 - 2

Coordinates below are the archeology co-ordinates from the original and the revised datum point.

Excavation Unit	Original Coordinates	Calculated Coords	Excavator
SW 1	180200N	58502300N	Lisa Sonnenburg

Casselman survey - summary information

Part Of: RG 7 Beverley Nicholson fonds
Description Level: Sub sub series
Series Number: 1.1.1
GMD: multiple media
Date Range: 2003
Material Details: Field journals have been scanned in multi-page PDF files. Artifact catalogues are PDF files in spreadsheet format. Photographs are in jpeg format.

History /

Biographical:

Archaeological testing began in the Crepeelee locale in May 2003 with a field crew of four members. James Graham supervised the crew and was assisted by Sarah Graham, Jollana Bishop, and Lisa Sonnenburg. Later additions to the testing team were Todd Kristensen, Michael Evans, and Emily Ansell.

The methodology for this survey used an arbitrary datum and a transit to establish a grid of 30 m intervals and a shovel test every 20 m. Materials were removed and screened to a minimum depth of 50 cm below surface. All recovered materials were bagged and removed to the lab for further analysis. All information including: test pit grid co-ordinates; UTM co-ordinates for each test pit; artifact presence; excavator; vegetation; aspect; paleosol; paleosol depth; and notes, were entered into a GIS database.

Approximately 600 shovel test pits were excavated and recorded in this fashion. Of the 600 shovel test pits, over 300 contained cultural materials. Based on the results of the Casselman survey several areas were designed for further testing and excavation. Crepeelee West and Crepeelee East were renamed the Sarah site DiMe-28) and Crepeelee 3 which became the Crepeelee site DiMe- 29.

Scope and Content:

Sub-sub-sub series contains: Summary information of field methodology, number and co-ordinates of excavations, personnel and their staff position; Field journals are daily records of recoveries, features and activities at the site; Site records include excavation level and unit summaries, feature sheets, profiles; sample records and maps; Artifact catalogues are lists and identifications of all artifacts recovered; Photographs are of excavation units, features, the landscape and personnel.
