Atkinson site - DiMe-27

<http://archives.brandonu.ca/en/permalink/descriptions12080>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 2.1

Accession Number: 1-2010

GMD: multiple media

Date Range: 2003-2006

History /

Biographical:

The Atkinson site was named for the landowners Ken and Karen Atkinson who were very helpful to the archaeology and geoarchaeology crews that worked at the site. Their support made the project possible.

The Atkinson site story begins with the discovery of a charcoal lens eroding from the north bank of the Souris River in the summer of 2002. Study of Cultural Adaptations on the Prairie Ecozone (SCAPE) project geoarchaeologist Dr. Garry Running was exploring the stratigraphic layering in the bank when he noted the lens and reported it to Dr. Bev Nicholson. Upon closer examination, a tiny pressure flake was observed on the lens exposure and it was decided to collect a charcoal sample for radiocarbon dating.

The resulting date of 5250B.P. cal. 4225 B.C. placed the site in the early Archaic period. A second date on bone collagen of 5580B.P. cal. 4500 B.C. confirmed the earlier date and gave an averaged date of circa 4400 B.C or 6,500 years ago.

The Atkinson site is one of the oldest excavated sites in Manitoba. Based on the date of the site and the kind of lithics (stone tools) present it is considered a Gowen occupation. The Atkinson site is evidence that bison hunters were active on the northern plains at a very early date. Similar sites have also been found on the High Plains in the U.S. and are referred to as the Mummy Cave Complex.

The Atkinson Site is of great importance as it is the first undisturbed site of this type to be excavated in Manitoba and extends the range of these sites south and east from the type-sites in central Saskatchewan. Based on the date and sample evidence further excavations were conducted by Dr. Nicholson's team. in 2003, 2004 and 2006.

Scope and Content:

Lovstrom Block C - summary

<http://archives.brandonu.ca/en/permalink/descriptions12517>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.4

Accession Number: 1-2010

GMD: multiple media

Date Range: 1987

History /

Biographical:

Block C was situated in sparse oak forest with an understory of saskatoon, hazelnut and a thick ground cover of poison ivy and sarsaparilla. The block measured 3m and 3m and contained nine excavation units. All units were excavated to 35cm below surface. The soil horizons were much like the other blocks, except for a rusty brown stain in the first level, giving the upper black loam a mottled appearance. The brown patches were clay mixed with loam and were harder than the surrounding matrix. No definitive interpretation of these phenomena was attempted but this effect may be the result of natural brush or forest fires. Under the 5cm so d/humus (Ah) layer, the loam horizon extended approximately 5cm – 25 cm below surface, and averaged 20 cm thick. Bone was concentrated within this horizon between 10 cm – 20 cm below surface.

Block C was notable for its concentrations of articulated bison bone. Most noteworthy was an articulated unit composed of lumbar vertebrae, pelvis, and sacrum. Several thoracic vertebra/proximal rib end concentrations were also recovered. There were more vertebrae and rib sections recovered in the units in proportion to other bones. A few sherds, some debitage and a single Prairie Side-Notched point fragment were among the recoveries. Based on the quantity of bone, the density of the bone layer, and the articulated butchering units the area has been interpreted as a bone midden.

Faunal material was analysed by Jessica MacKenzie for her Honours Thesis: "A reconstruction of butchering processes in Block C from the Lovstrom site DjLx-1 in Southwestern Manitoba."

Radiocarbon date: 850/115BP XU 79.

Scope and Content:

Sub-sub-sub series contains: Summary information of field methodology, number and co-ordinates of excavations, personnel and their staff position; Field journals are daily records of recoveries, features and activities at the site; Site records include excavation level and unit summaries, feature sheets, profiles; sample records and maps; Artifact catalogues are lists and identifications of all artifacts recovered; Photographs are of excavation units, features, the landscape and personnel.

Lovstrom Block D - summary

<http://archives.brandonu.ca/en/permalink/descriptions12540>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.5

Accession Number: 1-2010

GMD: multiple media

Date Range: 1987 - 1988

History /

Biographical:

Block D was wooded with oak and an understory of saskatoon and hazelnut with a thick ground cover of poison ivy and sarsaparilla. Root and rodent disturbance was extensive. Based on the recoveries from Test Unit 22 during the survey, further excavations were carried out. Two units 87 and 93 were excavated in 1987. A further four units were excavated in 1988. There appears to be a pre contact occupation and a protohistoric feature within the block.

Diagnostic lithics included a chert Plains Side-notch projectile point, and a large Woodland side-notched point. The lithic materials from Block D are primarily local cherts followed in abundance by Knife River Flint and Tongue River Silicified Sediment – both of which are exotics imported from the southwest. Faunal remains were primarily bison.

Thin-walled obliterated fabric impressed pottery with grit temper was recovered in all units. Diagnostic ceramics included two rims, one with a fabric impressed exterior and the lip notched with dowel impressions, and a second thick walled rim was fabric impressed to the lip. The ceramic wares appear to be essentially a Woodland complex with overtones of Plains influence.

RC date: 230/90 BP.

Scope and Content:

Flintstone Hill - DiMe-26

<http://archives.brandonu.ca/en/permalink/descriptions12283>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 2.2

Accession Number: 1-2010

GMD: multiple media

Date Range: 1997-2000

Flintstone Hill is located on the north bank of the Souris River. It is a deeply stratified lacustrine, fluvial and aeolian soil profile that has been exposed by the river through stream-bank erosion. This section is thought to be the most complete middle to late Holocene exposure on the northeastern plains. While the value of the site is primarily for paleo-environmental research and reconstruction, cultural deposits have been identified at the site. Local collectors have picked up lithic materials as they eroded out of the bank for the past several decades and it was they who had named the site. Mr. Bruce Timms from Lauder first drew the Flintstone Hill site to the attention of Dr. Nicholson of Brandon University.

During the mid 1990's to the early 2000's archaeological testing took place on Flintstone Hill. In 1998, an archaeological field crew dug a series of overlapping trenches down the slope of the profile and produced a schematic drawing. A peat layer at the bottom of this profile, dated from the top at 9,400 RCY and at the bottom to 10,400 RCY, has provided details of marsh plant and insect communities at this time.

Subsequent archaeological investigations at the site recovered several cultural deposits including: a hearth dating to 3250+/-70 R.C.Y. (BETA 109529); a butchered atlas bone 4090+/-70 R.C.Y. (BETA 109990); and bone fragments accompanied by Swan River Chert and Knife River Flint lithic flakes 5350+/-50 (BETA 109530). While no diagnostic tools were recovered, these dates suggest that this occupation, which is contemporary with the Atkinson site, may be a Gowen occupation.

Extensive paleo-environmental research has been conducted at the site. Dr. Running, a geomorphologist from the University of Wisconsin – Eau Claire, participated in the Study of Cultural Adaptations in the Prairie Ecozone (SCAPE) Project and he and his students tested the site for several years. He was joined in this effort by Dr. Havholm, Dr. Boyd, Dr. Wiseman, Dr. Beaudoin, and other SCAPE researchers in the interpretation of the paleo-environment of the Glacial Lake Hind basin. The following article is recommended reading.

Running, Garry L., Karen G. Havholm, Matt Boyd and Dion J. Wiseman
2002 Holocene Stratigraphy and Geomorphology of Flintstone Hill, Lauder Sandhills, Glacial Lake Hind Basin, Southwestern Manitoba. *Geographie Physique et Quaternaire* 56(2-3):291-303.

Hubert Weidenhamer collection

<http://archives.brandonu.ca/en/permalink/descriptions12347>

Part Of: RG 5 Western Manitoba Manuscript Collection
Description Level: Collection
Accession Number: 6-2011
GMD: multiple media

Date Range: April 11, 1943 - July 4, 1945
Physical Description: 4 cm textual records (48 letters)
2 photographs
press clippings and several facimiles
Physical Condition: Good

History /

Biographical:

Hubert Clayton Weidenhamer was born near Dand, Manitoba in 1926. He was raised in Dand and attended school in the Dand Consolidated School District. Weidenhamer enlisted in the Canadian Army in 1943. He became a member of the Princess Patricia's Canadian Light Infantry. Following training in Canada and England Weidenhamer was sent to Italy. He was badly wounded in battle in mid-September and died of his injuries in November 1944 at age 21. He was buried in the Ancona Military Cemetery, Ancona Italy.

Custodial History:

These records were in the possession of Bea Chapin (née Weidenhamer) following their creation in the 1940s until they were donated to the S. J. McKee Archives in January 2011.

Scope and Content:

Collection consists of correspondence from Hubert Clayton Weidenhamer to his sister Bea. The letters begin in the spring of 1943. Weidenhamer had enlisted in the Canadian Army in January 1943. His letters detail his induction into military life in Fort Garry, Winnipeg and his training experience in Canada, principally at Camp Ipperwash, Lambton County, Ontario. He relates his experience of travels on leave to Detroit. Weidenhamer left Canada from Halifax in late 1943 and arrived in Great Britain in December for additional military training. In England, maintaining his morale, waiting for deployment, and coming to terms with British currency were challenges. Transferred to the Princess Patricia's Canadian Light Infantry, Weidenhamer was deployed to Italy in March 1944. The letters dating from March 1944 to September relate in oblique fashion his's experience of military life on the Italian frontier as the Canadian Army fought its way north - "hard fighting" - and the impact of the war on Italian cities and the countryside. He was "proud" of his conduct in action. Weidenhamer's last letter is dated September 11, 1944.

Collection also includes correspondence on Weidenhamer's behalf from his military Chaplin; two press clippings dealing with his military career, and several facimiles of telegrams and correspondence from the Canadian government officials related to Weidenhamer's death and burial in Italy.

Lovstrom survey

<http://archives.brandonu.ca/en/permalink/descriptions12407>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.1

Accession Number: 1-2010

GMD: multiple media

Date Range: 1985-1986

History /

Biographical:

The Lovstrom surface collection came from small fields cleared within, and adjacent to, the major portions of the site which were excavated. The Lovstroms initial collection has since been added to by field personnel from Brandon University. The initial collections consisted of lithics and ceramics. A collection of faunal remains from the cultivated area was made by a Brandon University zooarchaeology class in 1986 which yielded specimens of elk, canid, mussels, and sucker, in addition to an expected abundance of bison. Since these materials were in a surface context, it may be that some of the faunal remains were historic.

The high biodiversity and evidence of pre-European contact prompted the decision to test the Lovstrom locale. Nine 1m² units were excavated in 1985 and, in 1986, an additional 15 1m² units were excavated for a total of 24 test units. This testing indicated the presence of a large precontact locale with lithics, woodland ceramics and large amounts of reasonably well-preserved faunal materials.

The lithics indicated a late Prehistoric occupation (Nicholson 1986:35). However, the ceramics were more useful in that they identified the presence of Late Woodland cultures (Blackduck and Duckbay) and a single Middle Missouri vessel. It is believed that the Middle Missouri vessel was imported since the paste and construction/decorative technology differ distinctively from that of all other vessels recovered from the site. It was on the basis of an examination of these surface finds that the decision to test the Lovstrom site was made. These test excavations were conducted during the summers of 1985 and 1986.

Field investigations through shovel tests, excavation units, and examination of rodent mounds, indicated that the cultural deposits at the Lovstrom locale extend approximately 500m north from the edge of the Souris channel and eastward for over two hundred meters from the escarpment along Jock's Creek. The presence of dense forest vegetation covering much of the locale, and the subsurface nature of the archaeological deposits obscured surface indications.

Lovstrom Block A - summary

<http://archives.brandonu.ca/en/permalink/descriptions12451>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.2

Accession Number: 1-2010

GMD: multiple media

Date Range: 1987

History /

Biographical:

Block A was the most southern site in the locale. The excavation block consisted of 12 contiguous 1m² units dug in a 3m x 4m rectangle. The block was the least productive of cultural materials, and bone preservation was the poorest. Under the sod, the black loam layer appeared at 5 cm below surface, and the glacial clay at 25 cm below surface. Excavators described the soil matrix as gritty and silty, and it became concrete hard when dried. The occupation or bone layer extended from 10 to 25 cm below surface and consisted of a contiguous scatter of FCR and unidentifiable large ungulate bone which was heavily processed and intensively scavenged by carnivores. Most cultural materials were recovered within this layer. Fire cracked rock (FCR) and small burnt bone fragments were present but no intact hearths or processing features were evident.

Non-cultural materials included limestone and other natural pebbles derived from the parent till. (These small limestone pebbles were apparent in the occupation layers in other blocks as well). Root and rodent disturbance was extensive throughout Block A. Most units were excavated to gravelly clay till. Nine of the twelve units were dug to level 4b, which ended at 40 cm b.s.

No further excavations were done at this site. No C14 dates were taken.

Scope and Content:

Sub-sub-sub series contains: Summary information of field methodology, number and co-ordinates of excavations, personnel and their staff position; Field journals are daily records of recoveries, features and activities at the site; Site records include excavation level and unit summaries, feature sheets, profiles; sample records and maps; Artifact catalogues are lists and identifications of all artifacts recovered; Photographs are of excavation units, features, the landscape and personnel.

Lovstrom Block B - summary

<http://archives.brandonu.ca/en/permalink/descriptions12479>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.3

Accession Number: 1-2010

GMD: multiple media

Date Range: 1987

History /

Biographical:

Block B consisted of 20 contiguous 1m² units excavated to 30 cm below surface. (except unit 58 which was excavated to 35 cm bs to obtain extended soil profile). The block is situated in recent oak and poplar forest at the head of a ravine leading to Jock's Creek, adjacent to an area cleared for market gardening. As was the case with Block A, the understory is heavily overgrown with hazelnut, chokecherry, saskatoon, and a poison ivy/sarsaparilla ground cover.

The soil levels below the sod in Block B consisted of a black, silty, and gritty loam layer from 5 cm to 23 cm below surface, a yellow and sandy clay from 23 cm to 30 cm below surface, and glacial till at 30 cm below surface. As in Block A, limestone cobbles were found throughout the occupation level around the bone. It is evident that bioturbation – primarily tree roots and rodent burrowing – have significantly altered patterns of original deposition of lithics, ceramics and small bone.

The faunal layer lay close to the surface, situated entirely in the black loam 5 cm – 23 cm below surface. The 23 cm depth also marked the end of the dark silty loam. At 10 cm below surface, a discernible patterning of the bone appeared. Concentrations of bone in narrow rows ran in an irregular pattern from the northwest to the southeast part of the block. This pattern was most apparent in the north end of the block which is the highest point in the block. In the same 1m² unit, patches of weathered, very poorly preserved bone would be found lying close to patches of well preserved bone. It is believed that this variability in preservation results from uneven rates of burial due to taphic activities of pocket gophers or other agents of bioturbation. The same pattern of uneven preservation occurs over much of the locale but is most evident in Block B.

Diagnostic lithics included eleven projectile points that were predominantly Plains or Prairie Side-notch types, but included two unnotched triangular points. Cord-wrapped impressed rim sherds and body sherds were recovered. The ceramics are variants of the Woodland Blackduck horizon.

RC dates: XU49 – 675/80 BP XU 59 – 705/75BP.

Sarah site DiMe-28

<http://archives.brandonu.ca/en/permalink/descriptions11829>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 1.3

Accession Number: 1-2010

GMD: multiple media

Date Range: 2003-2004

History /

Biographical:

The Sarah site was chosen for excavation based on the results of the Casselman survey. The survey recovered significant amounts of faunal remains, some ceramics and lithics from the test pits. Excavations took place in 2003 at Crepeelee West (Units 1-5) and Crepeelee East (Units 6-9). The site was subsequently renamed the Sarah site DiMe-28. In 2004 another 9 units were excavated (Units 10-18).

Based on the recoveries it was determined that the Sarah site is a stratified site with woodland ceramics in the upper occupation and late woodland points in both of the upper occupations. These upper occupations produced abundant bison bone including foetal bone. The lower occupations produced less bone and no foetal bone, although absence of foetal bone in the lower occupations does not necessarily indicate a warm season occupation. This could be due to sample error or peritoxic factors such as scavenging of the fragile bone by dogs or other carnivores.

The dates from the Sarah site include 550+/-40 B.P.; 1430+/-80 B.P.; 2810+/-80 B.P.; 3120+/-130 B.P. The lower occupations did not yield any diagnostic materials although debitage was abundant. These occupations were most productive at the edge of the large sand dune at the southern edge of the excavations. It is assumed that the major portion of these occupations have been overridden by the dune in the past 3000 years. Heavy earthmoving equipment would be required to remove this overburden which limits the possibility of future excavation.

Environment

The Sarah site is a large area located at the eastern end of the Crepeelee locale. Ground cover is a mosaic of aspen poplar groves and patches of mesic grass prairie. Excavation profiles indicate that this has been the situation since early precontact times, although as local climatic conditions change (primarily rainfall), the relative size of these areas and where they may have occurred also changed. The soil is aeolian sand sheet derived from delta outwash deposits along the western edge of glacial Lake Hind. The present topography is a variable dune landscape reworked by aeolian activity that creates a mosaic of microhabitats. These include forested patches in the lee of sand dunes with grassland on the southern and western exposures and small damp lowlands that support balsam poplar, willows, red osier dogwood, high-bush cranberry and water birch. There is no permanent water source in the area although a small seasonal stream meanders through a damp lowland to the east of the Sarah site.

Graham site DiMe-30

<http://archives.brandonu.ca/en/permalink/descriptions11886>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 1.4

Accession Number: 1-2010

GMD: multiple media

Date Range: 2004-2008

History /

Biographical:

The Graham site is located adjacent to the Crepelee site towards the western end of the Crepelee locale. The Graham site was initially designated as a separate site early in the testing of the Crepelee locale due to what appeared to be a distinction between Early and Late Woodland ceramics. Subsequent testing has shown that this distinction was premature and that the cultural mosaic represented in the western section of the Crepelee locale may not readily separate in this manner. However, due to the records management that was already in place, the original separate designations have been retained.

Environment

Ground cover is a mosaic of aspen poplar groves and patches of mesic grass prairie. Excavation profiles indicate that this has been the situation since early precontact times, although as local climatic conditions change (primarily rainfall), the relative size of these areas and where they may have occurred also changed. The soil is aeolian sand sheet derived from delta outwash deposits along the western edge of glacial Lake Hind. The present topography is a variable dune landscape reworked by aeolian activity that creates a mosaic of microhabitats. These include forested patches in the lee of sand dunes grassland on the southern and western exposures and small damp lowlands that support balsam poplar, willows, red osier dogwood, high-bush cranberry and water birch. There is no permanent water source in the area although a small seasonal stream meanders through a damp lowland along the eastern margin of the Crepelee locale.

Excavations at the Graham site took place from 2004 to 2008. Analyses of the recoveries shows that, with two exceptions, all of the occupations that have been tested produced bison foetal bone. The presence of foetal bison is a strong indicator of wintering occupations...The absence of foetal in some area does not necessarily indicate warm season occupations since these excavation series are small and the absence could be due to sample error or perthotoxic factors, such as scavenging of the fragile bone by dogs or other carnivores.

From this evidence the Graham site has been interpreted as being primarily a wintering area. This is consistent with the lack of surface water (snow would serve as a substitute in winter) and the abundance of wood for fuel – a critical requirement for winter occupation. Cultural occupations date from Mortlach circa 250 B.P to woodland circa 580 B.P.

Lovstrom Block F - summary

<http://archives.brandonu.ca/en/permalink/descriptions12617>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.7

Accession Number: 1-2010

GMD: multiple media

Date Range: 1988

History /

Biographical:

In 1988 four 1m² units were excavated in this Block F. The forest cover is identical to that of Block E, with an open oak forest with a light understory of saskatoon, hazelnut, poison ivy and sarsaparilla.

Underneath the litter mat (Ah) is a shallow, 15-20 cm "A" horizon of dark grey/brown silty loam with a high representation of pebble size clasts. The glacial clays, encountered at 20 cm below surface, consist of a matrix of light tan sandy clays containing rounded pebble to cobble size rocks.

The recoveries from this block consisted of a few ceramics, including Vickers Focus rim sherds, four lithic tools and a number of small bison bone fragments. There was no discernible cultural stratigraphy in the four 1m² units and the limited deposits of bone, ceramics and lithics were dispersed randomly throughout the 25 cm of cultural matrix. The lithic materials frequencies were similar to those in Block E with local cherts and KRF being the most abundant categories. A small amount of fire-cracked rock and a few large identifiable bison bones were recovered – all distributed randomly with little evidence for any pattern of clustering.

No RC dates.

Lovstrom Block G 1988 - summary

<http://archives.brandonu.ca/en/permalink/descriptions12628>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.8

Accession Number: 1-2010

GMD: multiple media

Date Range: 1988

History /

Biographical:

In 1988 four units were excavated in Block G. The vegetation is similar to other areas in the locale with an open oak forest with a light understory of saskatoon, hazelnut, poison ivy and sarsaparilla.

Excavations recovered artifacts between 0 cm – 15 cm b.s. The cultural deposits are very shallow and it is quite possible that what appears to be a single occupation may in fact represent multiple occupation compressed deposits as a result of deflation or the lack of sedimentation in this raised area. This latter view is supported by the ceramics which appear to be a mixture of Blackduck and Vickers Focus wares.

The frequency and distribution of cultural material from block G contrasts with that of other sites in the locale. While the diagnostic materials are similar, the nature of the background debris and the associated lithic assemblage suggests that this area was utilized for a different set of activities.

Unlike Blocks E and H, there is very little in the way of ceramics, fire-cracked rock or bison bone, yet a significant amount of lithic debitage and six Plains/Prairie Side-notched projectile points were recovered. No unifaces or scrapers were recovered. This may be an area where activities such as manufacture and hafting of projectile points; hunting activities, butchering and refuse disposal took place.

No RC dates were taken.

Scope and Content:

Sub-sub-sub series contains: Summary information of field methodology, number and co-ordinates of excavations, personnel and their staff position; Field journals are daily records of recoveries, features and activities at the site; Site records include excavation level and unit summaries, feature sheets, profiles; sample records and maps; Artifact catalogues are lists and identifications of all artifacts recovered; Photographs are of excavation units, features, the landscape and personnel.

Lovstrom Block G

Lovstrom Block H - summary

<http://archives.brandonu.ca/en/permalink/descriptions12638>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.9

Accession Number: 1-2010

GMD: multiple media

Date Range: 1988 - 1991

History /

Biographical:

The vegetation in block H is similar to other areas in the locale with an open oak forest with a light understory of saskatoon, hazelnut, poison ivy and sarsaparilla.

The excavations of the eight 1m² units in 1988 resulted in the recovery of over 650 ceramic fragments including 20 rim sherds from at least four vessels, a grooved maul, fire-cracked rock, lithic debitage and a reworked Avonlea projectile point. A large amount of bison bone, including a number of axial elements and a fragmented skull were also recovered.

Based on the 1988 recoveries at the site further excavations took place in 1991. Nine excavation units were opened next to the previous excavations. Another 250 ceramic sherds were recovered in 1991. Nine vessels have been identified based on rim sherds. Vickers Focus and Woodland vessels have been identified and two vessels similar to Scattered Village Complex were recovered.

The lithic material assemblage is intermediate between Blocks G and E with KRF being the most frequent material category followed by local cherts.

Two features, a hearth and a curvilinear arrangement of rock were recovered. The high numbers of ceramic fragments suggests a habitation area, rather than hunting or butchering behavior. However, the separation of occupations at the site is difficult to establish and there may be different uses of the site by successive occupations.

Radiocarbon dates from this block indicate two occupations separated in time by some 300 years. XU 181 – 405/110 BP and XU 184 – 780/110 BP.

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 3.6

Accession Number: 1-2010

GMD: multiple media

Date Range: 1987 - 1991

History /

Biographical:

This site is situated in a naturally sheltered area with a low rise to the east and south partly encircling a flat area open to the west. Present natural vegetation is an open oak forest with a light understory of saskatoon, hazelnut, poison ivy and sarsaparilla. It is situated on the till plain at the upper end of a ravine leading to Jock's Creek.

Two test units six meters apart were excavated in 1987 and produced cultural materials which warranted a block excavation, so seven contiguous 1m² units were then opened. These units proved to be very productive of cultural remains. Subsequent excavations in 1988 increased the number of excavated units to 21. In 1991 a further eight units were excavated for a total of 29 excavations and two test units. Excavations went deeper in this block than in Blocks C or B. Remains from the block included bison bone, bone tools, fire-cracked rock, ceramics, lithics including tools and debitage and a hearth. Another occupation was recovered in 1991 containing a hearth and living floor.

Radiocarbon samples have produced two distinct sets of radiocarbon dates from 1987 and 1988 excavations. There appears to be two or possibly three cultural horizons definable within this block.

An upper cultural horizon, located between 14-21 cm below surface, contains large bison bone and fire-cracked rock dating to 465/100B.P from XU 128.

A lower horizon in the 20-25 cm level contained FCR, bison bone and lithic scatter that was dated to 675/70 B.P. from XU 122 and 715/110 from XU 114.

Rev. Elijah Daniel Pound collection

<http://archives.brandonu.ca/en/permalink/descriptions13685>

Part Of: MG 2 Brandon College students

Description Level: Collection

Accession Number: 7-2014

GMD: multiple media

Date Range: ca. 1914 – 1931; predominantly 1920s

Physical Description: approximately 31 digital images (b/w)
textual records

Material Details: All records are reproductions. Photographs are digital scans.

History /

Biographical:

Reverend Elijah Daniel Pound (1881 – 1931) was a Brandon College alumnus and pioneer Baptist missionary tasked with opening the largest and most northern Baptist mission fields at Swan River and Bowsman, Manitoba.

Elijah D. Pound was born August 16, 1881, in Bayham Elgin County, Ontario, the second son of John and Rhoda Pound. Both Elijah and his brother, Orlo Lydia (b. February 12, 1880 – d. September 11, 1916), were trained in cabinetmaking but Elijah left the trade to enter the ministry, first at Woodstock Baptist College and then at Brandon College.

Pound was a student and boarder at Brandon College from 1910 to 1916 and again in the 1918-19 academic year. Brandon College registration cards identify Pound as an Arts student in 1912-13 and as a Theology student from 1913 onwards. On his Canadian Expeditionary Force (CEF) attestation papers, Pound identified the Brandon College COTC as his prior military experience.

Pound's name was listed in a Brandon Daily Sun article (26 April 1916) about five college students - Wallace Donogh, Norman McDonald, Frank Noble, James Rowell, and Herbert Staines – who withdrew from Brandon College examinations to head to Winnipeg to enlist with the 11th Field Ambulance Corps. Pound was reported to be joining them four days later.

In the interim, Pound married Bessie Lavinia Tolton (b. November 26, 1893 – d. August 11, 1987) on April 27, 1916, at her family home in Oak Lake, Manitoba. They would later have four children: John Henry Pound, Alberta Pound (Stevenson), Norman Elijah Pound, and Ernestine Pound. Pound's best man was Brandon College's COTC officer Sergeant Frederick Julian. Pound and his wife entrained to Winnipeg for a short honeymoon before he departed for service overseas. He formerly enlisted (regimental # 531794) with the 11th Field Ambulance Division in St. Vital, Manitoba, on May 1, 1916.

During the war, Pound's field ambulance cohort remained in contact while overseas and would often submit updates about each other to the Brandon College Quill; it was in The Quill that Pound was reported wounded and later invalided home. Pound was discharged from the CEF in May of 1918 after being deemed medically unfit.

After being invalided home, Elijah Pound was eligible to have his college expenses covered through the Department of Soldiers' Civil Re-Establishment Invalided Soldiers' Commission. He returned to Brandon College to complete his theology degree.

Prior to the war, Pound worked as a student Baptist preacher in the summers between College terms. In 1912, he preached in the district around Emmaville, northwest of North Battleford, Saskatchewan. After graduation, Pound became a travelling Baptist minister and lived in the Bowsman River (now Bowsman, Manitoba) parsonage with his family in the 1920s. He preached in the communities of Swan River, Bowsman River, Birch River, Lady Hubble, and Lenswood and was reported to have four other appointments in the Swan Valley. He also did missionary work north of Bowsman with the fishermen, lumbermen, and Aboriginals. This territory was considered the largest and most northern Baptist mission field in Manitoba.

Rev. Elijah D. Pound passed away on February 11, 1931, at Deer Lodge Hospital in Winnipeg following a kidney cancer diagnosis (hypernephroma). The Winnipeg Free Press (14 February 1931) reported his funeral service would be held at the Broadway Baptist Church on February 14th followed by an interment at Brookside Cemetery (Plot D2-0661-0). Another Brandon College alumnus, Reverend Evan McDonald Whidden, was in attendance at Pound's funeral.

College campus, Reverend Evan McDonald Thresh, was in attendance at the church as part of the contingent of Winnipeg Baptist ministers.

After his death, the Pound Memorial Baptist Church was opened in Bowsman, Manitoba. The formal dedication was held on November 8, 1931, with Rev. Dr. Litch, superintendent of the Manitoba Baptist mission, and the Rev. and Mrs. Smith among the 200 participants in attendance. At the opening, Pound's widow gifted the Memorial Church with its communion table.

Custodial History:

The collection of digital images are from the Rev. E.D. Pound's family photo album titled, "1920 to 1930; Rev. E.D. Pound and Family; Bowsman River, Manitoba; Pictures of Family, Local Church Members & Friends, Lumbering, Fishing, & Travel." The photographs are in the possession Rev. E.D. Pound's granddaughter, Patricia Ann Pound Holl of Winnipeg, Manitoba, who is the daughter of Pound's third child Norman Elijah Pound. The records were passed down to her through the family.

Ann Pound Holl visited Brandon on September 9, 2014, to see the exhibition "Brandon College and the Great War" (September 1, 2014 to December 23, 2014) on display in the Tommy McLeod Curve Gallery at Brandon University's John E. Robbins Library. The photographs in this collection were digitized that day. Ann's grandfather, E.D. Pound, was referenced in a letter on display from the Department of Soldiers' Civil Re-Establishment Invalided Soldiers' Commission (dated February 17th, 1919) [RG1 Series 11 Military Training Box 1 File 14] as well as listed in the College's new nominal roll. She brought with her her grandfather's photo album, copies of E.D. Pound's papers, and the Tolton Family self-publication "The Two Who Made Us Tell" written by Lillian Tolton Smith.

Scope and Content:

The collection consist of copies of Rev. E.D. Pound's marriage, enlistment, and death records; copies of newspaper clippings pertaining to Pound's marriage and death; and digital copies of photographs originally taken while Rev. Pound worked as a traveling Baptist missionary in the Swan Valley mission field.

DIGITAL IMAGES

The digital images were selected from the Rev. E.D. Pound's family photo album titled, "1920 to 1930; Rev. E.D. Pound and Family; Bowsman River, Manitoba; Pictures of Family, Local Church Members & Friends, Lumbering, Fishing, & Travel" and pertain to Rev. Pound's marriage in 1916 before serving overseas with the field ambulance division and his life after the war in northern Manitoba as a travelling Baptist minister in the 1920s. Northern Manitoba images consist of scanned photographs depicting the Bowsman River parsonage and congregation, the Lenswood School congregation, the Birch River Pioneer Store, winter logging and fishing activities, Rev. Pound performing baptisms and open air services, and the Pound Memorial Baptist Church.

TEXTUAL RECORDS

The textual records in the collection pertain to Rev. Pound's marriage in 1916, enlistment in the Great War, and death in 1931. Marriage records include copies of Pound-Tolton's 1916 marriage certificate, wedding photographs, and newspaper clippings announcing the marriage. Military records include 1916 attestation and 1918 discharge papers from the Canadian Expeditionary Force. Death records include copies of Pound's Manitoba Death Certificate and non-sourced newspaper clippings about Pound's death.

Copy of Pound-Tolton Marriage Certificate (dated April 27, 1916)

Copy of photograph of married couple Elijah Daniel Pound in military uniform with Bessie Lavinia Tolton

Copy of photograph of married couple Elijah Daniel Pound in suit with Bessie Lavinia Tolton and newspaper clippings "Emmaville News (1912)" and "Wedding Bells Pound-Tolton (April 27, 1916)"

Copy of Pound's Canadian Overseas Expeditionary Force No. XI Overseas Field Ambulance Attestation Paper (dated May 1, 1916)

Copy of Pound's Canadian Overseas Expeditionary Force Discharge Certificate (dated May 25, 1918)

Copy of Pound's Province of Manitoba Medical Certificate of Death (dated March 1, 1931)

Copies of non-sourced newspaper obituaries and articles about Pound's death:

- o "Rev. E.D. Pound, Baptist Minister, Dies in Hospital" [from The Manitoba Free Press (16 February 1931, p. 4)]
- o "The Pound Memorial Church"
- o "Missionary on Frontier to be Buried Today"
- o "Bowsman News"
- o "Our Honored Dead" [from The East Elgin Tribune (Aylmer Sun) for 12 October 1916]
- o "Obituaries – Pound"
- o "In Loving Memory"
- o "Rev E.D. Pound Dies in Winnipeg"
- o "Lavender News"

Copies of photograph of Rev. E.D. Pound from vanity publication of Tolton family history, "The Two Who Made Us Tell" (Lillian Tolton Smith)

John Weldon Grant collection

<http://archives.brandonu.ca/en/permalink/descriptions8219>

Part Of: RG 6 Brandon University fonds
Description Level: Sub-series
Series Number: MG 3 1.21

Accession Number: 3-2008
GMD: multiple media
Date Range: 1910; predominant 1961-1977.
Physical Description: 40 cm text; prints and art work.

History /

Biographical:

Professor John Weldon Grant was born 12 March 1919 in Sunnybrae, Nova Scotia, son of Alec and Linda Grant. He was raised in Sunnybrae and graduated from Pictou Academy in 1937. Prof. Grant entered Pine Hill Divinity School to study Theology. During his ministerial internship, he taught and preached in Rabbit Lake and Biggar, Saskatchewan. He graduated from Pine Hill in 1943 and entered the mission field with the United Church.

Professor Grant moved to Trinidad & Tobago in the 1940s. There he taught in both San Fernando and Siparia, towns located in the southwest tip of the island. Weldon Grant was the first head master of the Iere High School in Siparia when it opened in 1955. Professor Grant is recalled by Kenneth Ramchand in his *The West Indian Novel And Its Background* as "his beloved English teacher" reading from an early Sam Selvon novel in a "Saskatchewan version of Trinidad dialect." That he was teaching Selvon – a West Indian writer - testifies to Grant's cultural pluralism. See Kenneth Ramchand, *The West Indian Novel and its background* (London: Faber and Faber, 2001 edition).

Professor Grant and Bernice Emma Moats were married in Gray, Saskatchewan 30 June 1954. They adopted three children in Nova Scotia and returned to Trinidad.

In 1961, the Grants returned to Canada. Weldon taught for one year at Vincent Massey High School and then joined the English Department at Brandon University where he taught in the English department until his retirement on August 31, 1984.

During a sabbatical he spent six months exploring Ireland and the poets that had been inspired by its countryside. He also loved stories of the sea and read many varied authors, both factual and fiction.

Custodial History:

Records were collected by Weldon Grant during his teaching career in Trinidad and Canada.

Scope and Content:

In the course of his teaching career in Trinidad & Tobago and at Brandon University Professor Grant acquired and retained a number of items with cultural, scholarly and sentimental value. These include The First Folio of Shakespeare, prepared by Charlton Himan, [Academic ed.]. Imprint New York : W.W. Norton, 1968. xxvii, 928 p. : port. ; 37 cm. Mr. William Shakespeares comedies, histories, & tragedies. Published according to the true original copies. London, Printed by Isaac Iaggard, and Ed. Blount, 1623.

The facsimile is described as "an ideal copy in which each page represents the best page selected from one of the 29 most satisfactory copies of the 80 copies in the Folger Shakespeare Library."

1 Self pronouncing Holy Bible, Oxford 1910.

1 print 22.4" x 17," "Baking in a Clay Oven," by Trinidad artist David Moore, June 1977 printed in Trinidad by the College Press.

2 water colour paintings 17.5" x 12" by artist "AM." One titled San Fernando (1961) one titled Royal Palm, Trinidad (1960).

1 black and white portrait 10" x 13" of Governor general Roland Michener and his wife (No: A-2) copyright Karsh dated 1970.

1 Asian art work, 12.5" x 18" embroidery on silk.

The Order of United Commercial Travelers of America (UCT) fonds

<http://archives.brandonu.ca/en/permalink/descriptions8224>

Part Of:	RG 5 Western Manitoba Manuscript Collection
Description Level:	Collection
Accession Number:	5-2008
GMD:	multiple media
Date Range:	1908-2006
Physical Description:	2 m textual records 9 b/w photographs

History /

Biographical:

The Order of United Commercial Travelers of America (UCT) is a fraternal benefits society. It was founded in Columbus, Ohio on January 16, 1888 by eight traveling salesmen (commercial travelers) for the purpose of providing accident insurance for traveling salesmen, protecting the rights of its members and aiding those dependent upon them.

UCT came to Canada in 1898 with the creation of Winnipeg Council No. 154. The organization gradually spread westward with Councils established in Regina, Saskatoon, Calgary and Brandon. Brandon Council No. 448 was granted a charter on December 12, 1908.

Brandon Council No. 448 incorporated in 1984. Soon after they purchased and renovated the UCT Hall (now East Port Hall) at 530 Richmond Avenue East. The goals of Brandon Council No. 448 are "to improve our community, meet new friends, improve fellowship, to discover the best in ourselves and others, and to derive satisfaction from helping others." UCT Brandon Council No. 448 supports a number of organizations and programs in Brandon; to raise money, the Council holds a weekly bingo (first held on May 9, 1963) and a canteen at bingos. As well, they participate in an annual ticket raffle within Manitoba.

The governing body of UCT in the United States and Canada is the Supreme Council, which is located in Columbus, Ohio. States or groups of states and provinces are divided into Grand Jurisdictions; Manitoba, Saskatchewan and Alberta make up a Grand Jurisdiction, of which Brandon Council forms a part. The Grand charter was granted on June 10, 1911. Prior to 1911, Manitoba, Saskatchewan, and Alberta formed part of the Grand Jurisdiction of Minnesota and North Dakota.

Custodial History:

The UCT Brandon Council #448 decided to donate their records to the McKee Archives after selling their meeting hall (UCT Hall - now East Port Hall). Records were stored in East Port Hall on Richmond Avenue East until their donation in January 2008.

Scope and Content:

Fonds consists of: Brandon UCT Council scrapbooks (1974-1999, 1997-2006); Brandon Council minutes (1990-1996); unidentified attendance registers (probably Brandon); Minutes of the Grand Council of Manitoba, Saskatchewan and Alberta (1911-17, 1919); Proceedings of the Grand Council of Manitoba, Saskatchewan and Alberta (1914-15, 1917-19, 1922-35, 1937-62, 1964, 1966-75, 1977, 1981-83, 1988-89); Minutes and Correspondence of the Grand Council of Manitoba, Saskatchewan and Alberta (1958-59); Annual Reports to the Grand Council Manitoba, Saskatchewan and Alberta from various councils (1948, 1949, 1950, 1952); Grand Council of Manitoba, Saskatchewan and Alberta documents including Cash Book (1911-1948) and Ledger (1911-1948); Proceedings of the Supreme Council (1964-68); Proceedings of the Grand Council of Illinois (1956-57); Proceedings of the Grand Council of Minnesota and North Dakota (1931, 1949); Swift Current Council, minutes (1939-45, 1959-71), membership and financial records (1937-63); Lethbridge, attendance register (1914-1930, 1933-55); Regina, membership [nd]; Miscellaneous documents: Constitution and Bylaws UCT of America, 1962; The UCT Story 1888-1988, compiled by William C. Shortt; and 9 b/w photographs, various sizes.

Notes:

History/Bio information taken from the UCT website available at: <http://www.uct.org/History.html> (February 2008), from "The UCT Story: Do you Know It?" by James B. Chrisp, and published in the May 18, 1986 edition of the Sunday Sun, and the Brandon Council #448 pamphlet. Description by Christy Henry and Tom Mitchell.

William Whyte McCutcheon fonds

<http://archives.brandonu.ca/en/permalink/descriptions8559>

Part Of: RG 1 Brandon College fonds
Description Level: Sub-series
Series Number: MG 1 1.12
Accession Number: 12-2008
GMD: multiple media
Date Range: 1942-2007; predominant 1950-80.
Physical Description: 12 cm textual records
30 photographs
Physical Condition: Good

History /

Biographical:

Wilfred Whyte McCutcheon was born 20 April 1919 in Leeds Village, Quebec. McCutcheon attended Macdonald College at McGill University, graduating with a Bachelor of Agriculture in 1942. He completed a Bachelor of Science in 1943 at Concordia, a Bachelor of Arts in 1944, and a Bachelor of Education at Acadia in 1946. McCutcheon gained a Master's Degree in Economics from the University of Toronto in 1948 and completed his Doctoral studies at Cornell University in 1951. McCutcheon spent 1951-52 at the London Institute of Education engaged in postdoctoral studies.

McCutcheon was appointed the Dean of the Faculty of Education at Brandon College in 1955. He was the first Dean of Education at Brandon University. McCutcheon served as Dean until 1967.

With Ms. Joan Garnett, Co-ordinator of the Office of BU Alumni Relations, McCutcheon helped to establish many awards. With the collaboration of "Tommy" Douglas, Mrs. J.G. Diefenbaker, and Mr. D.L. Campbell, he assisted in the creation of the JRC Evans Student Loan Fund as a memorial tribute to Dr J.R.C. Evans, President of Brandon College 1928-1959.

From 1967 to 1974, McCutcheon taught at the Ottawa Teachers' College, later integrated into the Faculty of Education at the University of Ottawa.

McCutcheon authored over fifty academic articles. He was awarded a honorary Doctor of Education by Brandon University in 1989 and an honorary Doctor of Laws from Concordia University in 1996.

Wilfred Whyte McCutcheon died 31 March 2008. He was predeceased by his wife Phyllis Bishop in 2003.

Custodial History:

These records were in Dr. McCutcheon's possession until his death. They were donated to the S.J. McKee Archives by his estate executors and delivered to the archives by Mr. Gerald Brown on their behalf.

Scope and Content:

Fonds contains correspondence, pamphlets, publications, photographs, diplomas and certificates of standing, newspaper clippings, a report prepared by Dr. McCutcheon for the Canadian Governor General's Office concerning the Canadian honours system, a copy of Dr. McCutcheon's doctoral thesis - Cornell University, 1951- and miscellaneous materials related to Dr. McCutcheon's long and distinguished career in Canadian post secondary education and public service.

Brandon Folk, Music & Art Society, Inc. fonds

<http://archives.brandonu.ca/en/permalink/descriptions8761>

Part Of: RG 5 Western Manitoba Manuscript Collection

Description Level: Collection

Accession Number: 17-2008

19-2008

GMD: multiple media

Date Range: 1981-2001

History /

Biographical:

The Brandon Folk, Music, and Art Society, Inc. has been in existence since 1985, when it was founded by a group of Westman people interested in providing an alternative art and music festival for the western Manitoba region. That group sponsored the first annual Brandon Folk, Music, and Art Festival in September of 1985 and established the community-based, non-profit structure of the Society.

The Society's main goal is to provide musicians, artists and artisans with an opportunity to perform or display their talents on a professional level. The Society provides for its members and aspiring artists by sponsoring an annual Festival, coffeehouses, socials and other performances at local establishments, featuring local and touring performers.

The Society is governed by a volunteer board of directors from many sectors of the local community.

Custodial History:

Records in accession 19-2008 were in the possession of the Brandon Folk, Music & Art Society prior to their donation to the archives in September 2008.

Scope and Content:

Accession 17-2008 (12 cm, 1985-1988) consists of 10 files containing promotional materials, meeting minutes and planning documents for Society's annual music festival.

Accession 19-2008 (63 cm, 1981-2008) consists of: minutes, festival programs, publications, posters, financial records, correspondence; miscellaneous photographs.

Notes: History/Bio information taken from Society records. Description by Donna Lowe and Christy Henry.
