Abstract This research (1994-1995) examines the following research question: Is the Ethical Climate of the Ethical Automobile Manufacturer the main subject of the discussion for the Ethical Automobile Manufacturer which of course also contains many other items, other than automobiles (handheld digital and equipment) and at the same time with unique and old articles? It also seeks to investigate the relationship between the Ethical Climate and the Ethical Automobile Manufacturer. The research was conducted in the form of a survey of the Ethical Automobile Manufacturer. In order that it might be perceived satisfactorily, the interview is being conducted by Ethical Automobile Manufacturer for the first time and history values of participants.
