Atkinson site - DiMe-27

<http://archives.brandonu.ca/en/permalink/descriptions12080>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 2.1

Accession Number: 1-2010

GMD: multiple media

Date Range: 2003-2006

History /

Biographical:

The Atkinson site was named for the landowners Ken and Karen Atkinson who were very helpful to the archaeology and geoarchaeology crews that worked at the site. Their support made the project possible.

The Atkinson site story begins with the discovery of a charcoal lens eroding from the north bank of the Souris River in the summer of 2002. Study of Cultural Adaptations on the Prairie Ecozone (SCAPE) project geoarchaeologist Dr. Garry Running was exploring the stratigraphic layering in the bank when he noted the lens and reported it to Dr. Bev Nicholson. Upon closer examination, a tiny pressure flake was observed on the lens exposure and it was decided to collect a charcoal sample for radiocarbon dating.

The resulting date of 5250B.P. cal. 4225 B.C. placed the site in the early Archaic period. A second date on bone collagen of 5580B.P. cal. 4500 B.C. confirmed the earlier date and gave an averaged date of circa 4400 B.C or 6,500 years ago.

The Atkinson site is one of the oldest excavated sites in Manitoba. Based on the date of the site and the kind of lithics (stone tools) present it is considered a Gowen occupation. The Atkinson site is evidence that bison hunters were active on the northern plains at a very early date. Similar sites have also been found on the High Plains in the U.S. and are referred to as the Mummy Cave Complex.

The Atkinson Site is of great importance as it is the first undisturbed site of this type to be excavated in Manitoba and extends the range of these sites south and east from the type-sites in central Saskatchewan. Based on the date and sample evidence further excavations were conducted by Dr. Nicholson's team. in 2003, 2004 and 2006.

Casselman survey

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 1.1

Accession Number: 1-2010

GMD: multiple media

Date Range: 2003-2008

History /

Biographical:

The high biodiversity and evidence of pre-European contact prompted the decision to test the Crepeelee locale. The survey was named in recognition of the Casselman family, the original landowners.

Archaeological testing began in the Crepeelee locale in May 2003 on property now owned by the Crepeelee family. The locale covers over 6 sections or approximately 3,800 acres of land in an area of stabilized sand dunes and wetlands covered with mixed forest and prairie grass. Given the terrain, the size of the crew and time constraints, an area of approximately 60 acres was chosen for the survey. The survey used the established archaeological methodology of walking the selected area and using a shovel test surveyed grid. The use of GIS technology to locate the exact test spot and record the information into a GIS database was a significant advance and was one of the advantages of the integration of multi-disciplinary techniques encouraged by the SCAPE project. Over one half of the test pits resulted in the recovery of cultural materials. The results of the Casselman survey indicated several areas for further examination including areas that became the Crepeelee, Sarah and Graham sites.

Crepeelee locale Radiocarbon Dates

Description Level: Sub-series

Series Number: 1.5

Accession Number: 1-2010

Date Range: 2003-2008

Material Details: Radiocarbon date reports have been scanned in multi-page PDF files.

History /

Biographical:

The Crepeelee locale is located within the larger Lauder Sandhills area, located in southwestern Manitoba. The area is a complex region of high biodiversity made up of stabilized sand dunes and wetlands that encourage the development of mixed forest and grass prairie. This area provided a variety of subsistence resources for pre-European hunter-gatherers. At the present time the grass prairie is now farm land but the areas of vegetated sand dunes have not been cultivated and have revealed numerous pre-contact archaeological sites.

Archaeological surveying was conducted in 2003. The results of the 2003 Casselman survey showed over 300 test units contained cultural material and indicated several areas for further examination including the Crepeelee site DiMe-29, Sarah site DiMe-28 and Graham sites DiMe-30.

From 2003 to 2008 field work took place at the locale with 75 - 1m x 1m units excavated. The Crepeelee locale is a complex region of high biodiversity made up of stabilized sand dunes and wetlands that encourage the development of mixed forest and grass prairie. This area provided a variety of subsistence resources for pre-European hunter-gatherers. At the present time the grass prairie is now farm land but the areas of vegetated sand dunes have not been cultivated and have revealed numerous pre-contact archaeological sites.

To help establish the cultural sequence at the locale Radiocarbon dates were obtained from the three sites in the Crepeelee locale.

Radiocarbon dating

The technique of radiocarbon dating was developed by Willard Libby and his colleagues at the University of Chicago in 1949.

Radiocarbon dating is used to estimate the age of organic remains from archaeological sites. Organic matter has a radioactive form of carbon (C14) that begins to decay upon death. C14 decays at a steady, known rate of a half life of 5,730 years. The technique is useful for material up to 50,000 years. Fluctuations of C14 in the atmosphere can affect results so dates are calibrated against dendrochronology. Radiocarbon dates are calibrated to calendar years.

Dates are reported in radiocarbon years or Before Present. Before Present refers to dates before 1950. The introduction of massive amounts of C14, due to atomic bomb and surface testing of atomic weapons, has widely increased the standard deviation on all dates after A.D. 1700 causing these dates to be unreliable.

Accelerated mass spectrometry can more accurately measure C14 with smaller samples and can date materials to 80,000 years.

Duthie site DiMe-16

<http://archives.brandonu.ca/en/permalink/descriptions10216>

Part Of: RG 7 Beverley Nicholson fonds
Description Level: Sub-series
Series Number: 4.1
Accession Number: 1-2010
GMD: multiple media
Date Range: 1992-2002

History /

Biographical:

The Duthie site is the first site identified in the Makotchi-Ded Dontipi locale. It was reported to Dr. Bev Nicholson by Doug Jackson, a local collector who had observed archaeological materials that had been exposed during the construction of Maple Hill Road northwest of Lauder. The site is named after the landowner, Randy Duthie.

The initial inspection of the exposed materials indicated that the eastern half of the site had been severely impacted by raising a road grade using an elevating grader. However, an undetermined amount of the site remained to the west, flanked by a low sand dune. Testing and preliminary excavations were conducted in 1992-93. In 1994 a field school added to the excavated sample. The undisturbed portion of the site, west of Maple Hill Road was situated at the base of a low sand dune and had an aspen and willow forest cover. The water table was approximately one meter below surface at the time of excavation. A rising water table has since prevented further excavations.

Two dates on bone collagen were obtained during excavations. These were 880+/-80 B.P. (Beta 62705) and 970+/-40 B.P. cal. 1030 A.D. (TO 13366). These dates are consistent with an Initial Middle Missouri cultural assignment. The site occupation is identified by the distinctive ceramics found there. Ceramics at the Duthie Site are tool impressed with incising and lip modeling with fabric impressions on most vessels. Jill Taylor analysed the ceramics from the site for a Specialist thesis, Brandon University (1994) and a Masters of Arts degree from the University of Saskatchewan. (Taylor 1995).

Analysis of residue from Duthie site pottery by Matthew Boyd recovered corn (*Zea mays*) phytoliths and bean (*Phaseolus* sp.) starch grains indicating consumption of these domesticates at the Duthie site. (Boyd 2006)

The occupation of this site indicates a migration of people from the south who were well acquainted with horticultural farming. These people had previously migrated to South Dakota following river valleys into the central plains from the eastern woodlands during late Hopewell times. It appears that they later migrated well to the north into southern Manitoba but there is no evidence that they remained there for more than a single year.

Flintstone Hill - DiMe-26

<http://archives.brandonu.ca/en/permalink/descriptions12283>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 2.2

Accession Number: 1-2010

GMD: multiple media

Date Range: 1997-2000

History /

Biographical:

Flintstone Hill is located on the north bank of the Souris River. It is a deeply stratified lacustrine, fluvial and aeolian soil profile that has been exposed by the river through stream-bank erosion. This section is thought to be the most complete middle to late Holocene exposure on the northeastern plains. While the value of the site is primarily for paleo-environmental research and reconstruction, cultural deposits have been identified at the site. Local collectors have picked up lithic materials as they eroded out of the bank for the past several decades and it was they who had named the site. Mr. Bruce Timms from Lauder first drew the Flintstone Hill site to the attention of Dr. Nicholson of Brandon University.

During the mid 1990's to the early 2000's archaeological testing took place on Flintstone Hill. In 1998, an archaeological field crew dug a series of overlapping trenches down the slope of the profile and produced a schematic drawing. A peat layer at the bottom of this profile, dated from the top at 9,400 RCY and at the bottom to 10,400 RCY, has provided details of marsh plant and insect communities at this time.

Subsequent archaeological investigations at the site recovered several cultural deposits including: a hearth dating to 3250+/-70 R.C.Y. (BETA 109529); a butchered atlas bone 4090+/-70 R.C.Y. (BETA 109990); and bone fragments accompanied by Swan River Chert and Knife River Flint lithic flakes 5350+/-50 (BETA 109530). While no diagnostic tools were recovered, these dates suggest that this occupation, which is contemporary with the Atkinson site, may be a Gowen occupation.

Extensive paleo-environmental research has been conducted at the site. Dr. Running, a geomorphologist from the University of Wisconsin – Eau Claire, participated in the Study of Cultural Adaptations in the Prairie Ecozone (SCAPE) Project and he and his students tested the site for several years. He was joined in this effort by Dr. Havholm, Dr. Boyd, Dr. Wiseman, Dr. Beaudoin, and other SCAPE researchers in the interpretation of the paleo-environment of the Glacial Lake Hind basin. The following article is recommended reading.

George E. Thorman was born in Vancouver, British Columbia on September 17, 1913. His public school education began in Rivers, Manitoba and was completed, along with his high school and part of his university education in Brandon, Manitoba. After completing his Bachelor of Arts General at Brandon College, Thorman attended the College of Education in Toronto for one year before beginning his teaching career at Essex High School, Essex, Ontario in 1935. After four years in Essex, Thorman transferred to the St. Thomas Collegiate Institute (STCI) in St. Thomas, Ontario.

In 1941, Thorman joined the Canadian Army at Brandon as a gunner in the 59th Field Battery and after five years, having served in England, Italy and Western Europe, he retired with the rank of Captain. Following the Second World War, in 1945, Thorman taught in a high school for Fifth Division in Gronigen, Netherlands before moving on to teach first year university English at Kahki College in England in 1946. That same year he returned to Canada and rejoined the staff at STCI. Two years after his return George Thorman married the former Margaret Gliddon of St. Thomas and in 1953 returned to Europe where he taught in Scotland for one year on a teacher's exchange.

During the 1960's, Thorman's career reached its peak. In 1964, he became the Vice-Principal of STCI and in 1967, he attained the same position at Parkside Collegiate Institute before becoming its Principal in 1969. Three years later in 1972, Thorman retired as Principal of PCI and from his teaching career. Throughout his career Thorman's primary interests were in English and History, however he also taught Mathematics, Geography and Science. In addition to his classes following WWII, Thorman was an active instructor of the Cadet Corps, as well as a coach for various volleyball, basketball and track and field teams during his years at STCI.

Aside from being an educator, George Thorman had many other interests. He and his wife Margaret were active in the formation of the Elgin Theatre Guild in 1948 and together and separately they performed and directed several productions in the early years of that organization. Thorman was also largely responsible for the development of a local history course in the Elgin Secondary Schools in the early 1960's. In 1966, with his fellow history teacher Ralph Parker, he published a booklet to serve as an outline for teachers on the history

teacher Ralph Hunter, he published a booklet to serve as an outline for teachers on the history of Elgin County.

That same year, 1966, Thorman, as the prime instigator in the re-formation of the Elgin Historical Society, became its first president and in 1971, he was elected Honorary President of the Society for life. This was followed by a further two-year term as elected president. The re-organization marked the beginning of Thorman's continuous active involvement with the EHS, including several lectures he presented to its members and many years as a Trustee. In 1985, he received the Ontario Volunteer Service Award for over 15 years of continuous service to the Society before retiring from the EHS in 1995.

In addition to the EHS, Thorman served on the St. Thomas Public Library Board from 1979 until 1991, and was a Chairman of the Board's Personnel Committee. He was also a member of the Ontario Historical Society. From 1975 to 1978, Thorman served as an elected member of the Elgin County Board of Education and in 1979, he received from the City of St. Thomas the St. Thomas Civic Award for outstanding citizens. George Thorman was also a life member (1936) of Central Lodge No. 402, A.F. and A.M. (Masonry) of Essex, Ontario and had been an active member of the St. Thomas Duplicate Bridge Club since 1985.

As an authority on historical research relating to The Hudson's Bay Company, Thorman gave lectures and printed articles on the topic in "The Beaver" publication of The Hudson's Bay Company. In regards to the HBC he also did excavation work at Fort Albany with Walter Kenyon during several summers in the 1960's and 1970's.

As well, George Thorman was a founding member and served on the executive committee of the Elgin Military Museum since its inception in 1982 until the late 1990's. He contributed greatly to the library and files of this museum, particularly in the field of the War of 1812 and the Fenian Raid. The reference library of this small museum rates high in this country, largely through the efforts of George Thorman. Thorman's book collection was one of the finest and most extensive in Western Ontario. His personal library contained a wealth of information with particular emphasis on material relating to Elgin County, the City of St. Thomas and The Hudson's Bay company. His G.A. Henty collectio was nearly complete.

As an author Thorman contributed ten entries in The Dictionary of Canadian Biography on Aboriginal and Metis peoples, co-authored "St. Thomas 100 Years a City," the centennial history of the city of St. Thomas. In 1989, he edited "Frank Hunt, Essays on Elgin County" as well as wrote and privately printed "A Brief History of Secondary Education in St. Thomas" as his contribution to the STCI Reunion, at which he was one fo the honorees. In th early 1990's, Thorman co-edited "Garret Oakes, Tales of a Pioneer," authored and privalely printed "Letters and Petitions and other Papers Concerning the Mllitia Companies of Middlesex for 1839" and "The Chisholm Family in Elgin County: Myth and Reality."

For serveral years, ca. 1975 to the mid 1990's, Thorman hosted a TV talk show on local television interviewing persons connected to the history of St. Thomas and Elgin County. Many older residents, who have since passed away, were interviewed and the resulting tapes are an invaluable source of historical information.

Thorman and his wife lived in the historic section of St. Thomas and in the summer months spent their time in Port Stanley. In addition, for several years in the early 1990's, Thorman traveled annually to England - each time visiting a different area of the country. The couple remained in Arvida for twenty-two years, during which time they had four children: Sharon, Heather, Geoffrey and David.

In 1973, Lindsay was transferred to Alcan's head office in Montreal where he spent the next three years co-ordinating alumina research in Alcan plants around the world. In 1976, he accepted a transfer to Alcan Jamaica as Chief Technical Officer and Manager of Technical Development. He and Shirley spent nearly eight years in Jamaica before returning to Canada in 1984. After a year at Alcan's Research Centre in Kingston, ON Lindsay took early retirement.

During their years in Jamaica Lindsay had been introduced to Rotary and he continued his association with the organization in Kingston where for fifteen years he was Bulletin editor of the Kingston-Frontenac Rotary Club. In addition to Rotary, Lindsay (along with his wife) took up genealogy in his retirement and after fifteen years of extensive travel and research he became his Lindsay family's historian and author of The Lindsays of Dundonald.

For three years in the late 1980s Lindsay served as a representative on the Brandon University Alumni Executive for Eastern Canada. Along with his wife he attended two class reunions at Brandon University including his 50th Re-convocation in 1996.

At present (June 2010) Gordon Lindsay continues to live in Kingston, ON with his wife.
