## History /

### Biographical:

A.E. McKenzie was born in Wilcox Lake, York County, Ontario in 1870 to F.B. and Maria (Carley) McKenzie. His family came to Manitoba in 1883. He was educated in Brandon, Manitoba and graduated from the Collegiate Institute at age 21. In 1897 he founded the Brandon Seed House. McKenzie was present at the cornerstone-laying ceremony of Brandon College on July 13, 1900. From that moment on, he was very involved in the College, first as an interested businessman, and later as a member of its Board of Directors. In 1902, McKenzie married Laura Bell in Port Arthur. They had two daughters, Marjorie Bell and Kathleen. In 1906 the Brandon Seed House was incorporated and from then on was known as the "A.E. McKenzie Co. Ltd.."

McKenzie became a member of the Brandon College Endowment Committee in 1918. The following year he was on the Finance Committee. By 1925, McKenzie was a member of the Board of Directors. In 1928, he was part of a syndicate that advised the Baptist Union that they were developing an endowment plan to provide continuing financial support to the College and talked the Union into providing \$10 000 towards the accumulated deficit.

In 1931, McKenzie organized the Brandon Board of Trade to help save Brandon College when the Baptists said they could no longer afford to keep the College. After the By-law failed, he helped to organize the Brandon Citizen's Campaign to raise enough money so that the College could open the following year.

When the Baptists withdrew support in 1938, McKenzie was one of the central figures on the Brandon Board of Trade that decided to save the College from closure. A representative delegation from Southwestern Manitoba of over 60 men descended upon Premier Bracken's office to try and convince him to help the College. On June 12, 1938 McKenzie said he would set up a \$100 000 endowment to Brandon College. He subsequently raised this amount to \$300 000. On August 1, 1938 the Board of Trade launched a campaign to raise \$15 000 to match what the government was prepared to offer the College. McKenzie was asked to provide Brandon College with \$3000 personally. In September of 1938, McKenzie upped his endowment once more to \$500 000. The fund raising worked however, and the charter establishing Brandon College Incorporated was assented to on April 17, 1939. On June 6, 1939 a by-law was again presented to the citizens of Brandon, and fortunately it passed.

In 1941, McKenzie received an honorary L.L.D. from the University of Manitoba. The A.E. McKenzie Foundation was created in 1945 by the provincial government, who had assumed 90% of the A.E. McKenzie Co. Ltd. stock.

On September 25, 1964 McKenzie died at the age of 94. He never retired, but worked full time until two weeks before his death. The funeral was held in the J.R.C. Evans Lecture Theatre. The Arts and Library Building at Brandon College was completed in 1960, and is known as the A.E. McKenzie building, in honour of the man who contributed so much time, effort and financial help to the College during a crucial period in its history.

### Custodial History:

Records were accessioned by the McKee Archives in 1998. Prior custodial history is unknown.

#### Scope and Content:

A.E. McKenzie's records in the Brandon College fonds are very useful from an administrative point of view. Because McKenzie was so involved in Brandon College from the very beginning until his death in 1964, it is easy to understand how the College Administration arrived at decisions. There is correspondence between McKenzie and various regarding College and Board of Director business. There are Brandon College financial statements and letters regarding the A.E. McKenzie Foundation. The records contain newspaper clippings, pamphlets and lists of names of members of various Brandon organizations. As well, McKenzie has letters regarding Building Expansion in the 1940's and minutes of Board of Director meetings. There are also several photographs. One photograph is the 1919 graduation picture of Zoe Hough. Another is tentatively identified as Frances Wolverton, also of the Class of 1919. There are two more photographs of unidentified young women.

## Atkinson site - DiMe-27

<http://archives.brandonu.ca/en/permalink/descriptions12080>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 2.1

Accession Number: 1-2010

GMD: multiple media

Date Range: 2003-2006

History /

Biographical:

The Atkinson site was named for the landowners Ken and Karen Atkinson who were very helpful to the archaeology and geoarchaeology crews that worked at the site. Their support made the project possible.

The Atkinson site story begins with the discovery of a charcoal lens eroding from the north bank of the Souris River in the summer of 2002. Study of Cultural Adaptations on the Prairie Ecozone (SCAPE) project geoarchaeologist Dr. Garry Running was exploring the stratigraphic layering in the bank when he noted the lens and reported it to Dr. Bev Nicholson. Upon closer examination, a tiny pressure flake was observed on the lens exposure and it was decided to collect a charcoal sample for radiocarbon dating.

The resulting date of 5250B.P. cal. 4225 B.C. placed the site in the early Archaic period. A second date on bone collagen of 5580B.P. cal. 4500 B.C. confirmed the earlier date and gave an averaged date of circa 4400 B.C or 6,500 years ago.

The Atkinson site is one of the oldest excavated sites in Manitoba. Based on the date of the site and the kind of lithics (stone tools) present it is considered a Gowen occupation. The Atkinson site is evidence that bison hunters were active on the northern plains at a very early date. Similar sites have also been found on the High Plains in the U.S. and are referred to as the Mummy Cave Complex.

The Atkinson Site is of great importance as it is the first undisturbed site of this type to be excavated in Manitoba and extends the range of these sites south and east from the type-sites in central Saskatchewan. Based on the date and sample evidence further excavations were conducted by Dr. Nicholson's team. in 2003, 2004 and 2006.

## Casselman survey

<http://archives.brandonu.ca/en/permalink/descriptions11706>

Part Of: RG 7 Beverley Nicholson fonds

Description Level: Sub-series

Series Number: 1.1

Accession Number: 1-2010

GMD: multiple media

Date Range: 2003-2008

History /

Biographical:

The high biodiversity and evidence of pre-European contact prompted the decision to test the Crepeelee locale. The survey was named in recognition of the Casselman family, the original landowners.

Archaeological testing began in the Crepeelee locale in May 2003 on property now owned by the Crepeelee family. The locale covers over 6 sections or approximately 3,800 acres of land in an area of stabilized sand dunes and wetlands covered with mixed forest and prairie grass. Given the terrain, the size of the crew and time constraints, an area of approximately 60 acres was chosen for the survey. The survey used the established archaeological methodology of walking the selected area and using a shovel test surveyed grid. The use of GIS technology to locate the exact test spot and record the information into a GIS database was a significant advance and was one of the advantages of the integration of multi-disciplinary techniques encouraged by the SCAPE project. Over one half of the test pits resulted in the recovery of cultural materials. The results of the Casselman survey indicated several areas for further examination including areas that became the Crepeelee, Sarah and Graham sites.

Scope and Content:

Sub sub series has been divided into five sub sub sub series including: (1) Summary information; (2) Field journals; (3) Site records; (4) Artifact catalogues; and (5) Photographs.

## Duthie site DiMe-16

Part Of: RG 7 Beverley Nicholson fonds  
Description Level: Sub-series  
Series Number: 4.1  
Accession Number: 1-2010  
GMD: multiple media  
Date Range: 1992-2002

## History /

### Biographical:

The Duthie site is the first site identified in the Makotchi-Ded Dontipi locale. It was reported to Dr. Bev Nicholson by Doug Jackson, a local collector who had observed archaeological materials that had been exposed during the construction of Maple Hill Road northwest of Lauder. The site is named after the landowner, Randy Duthie.

The initial inspection of the exposed materials indicated that the eastern half of the site had been severely impacted by raising a road grade using an elevating grader. However, an undetermined amount of the site remained to the west, flanked by a low sand dune. Testing and preliminary excavations were conducted in 1992-93. In 1994 a field school added to the excavated sample. The undisturbed portion of the site, west of Maple Hill Road was situated at the base of a low sand dune and had an aspen and willow forest cover. The water table was approximately one meter below surface at the time of excavation. A rising water table has since prevented further excavations.

Two dates on bone collagen were obtained during excavations. These were 880+/-80 B.P. (Beta 62705) and 970+/-40 B.P. cal. 1030 A.D. (TO 13366). These dates are consistent with an Initial Middle Missouri cultural assignment. The site occupation is identified by the distinctive ceramics found there. Ceramics at the Duthie Site are tool impressed with incising and lip modeling with fabric impressions on most vessels. Jill Taylor analysed the ceramics from the site for a Specialist thesis, Brandon University (1994) and a Masters of Arts degree from the University of Saskatchewan. (Taylor 1995).

Analysis of residue from Duthie site pottery by Matthew Boyd recovered corn (*Zea mays*) phytoliths and bean (*Phaseolus* sp.) starch grains indicating consumption of these domesticates at the Duthie site. (Boyd 2006)

The occupation of this site indicates a migration of people from the south who were well acquainted with horticultural farming. These people had previously migrated to South Dakota following river valleys into the central plains from the eastern woodlands during late Hopewell times. It appears that they later migrated well to the north into southern Manitoba but there is no evidence that they remained there for more than a single year.
