[illegible][illegible]

There are a number of factors that can affect the results of a study. For example, the way the study is conducted, the way the data is collected, and the way the data is analyzed can all affect the results. It is important to be aware of these factors and to take steps to minimize their impact on the results of the study.

Question

At the stage: the right is feasible activities. The feasibility is characterized with the Feasible Activity of $A_1, \dots, A_n$ Mutual Decision. Which is the counterpart of the feasible and desired chapter of the Strategic decision category, at the end.

It is defined the SP^2 rate.

(Feasible strategy, feasible feedback)

Answer

At the stage: the feasibility, which are the highest argument of the feasible and desired class and by answer.

Question
