History /

Biographical:

Established as Sewell Camp in 1909, it was renamed after Major-General Sir Sam Hughes, Canada's Minister of Militia and Defence, in 1915. During World War I (1914–1918), more than 38,000 troops of the Canadian Expeditionary Force trained there. Many of the soldiers later distinguished themselves at the battle of Vimy Ridge, in April 1917.

Extensive trench systems, grenade and rifle ranges, and military structures were built in 1915 and 1916. A variety of retail stores on a double-avenued area close to the main camp formed a lively commercial midway. Camp Hughes was dismantled in the 1930s as part of an unemployment relief project.

The Camp Hughes Military Training Site, located at NE 34-10-16 W, 10 kms west of Carberry, R.M. of North Cypress, was designated Manitoba Provincial Heritage Site No. 82 on April 18, 1994.

History /

Biographical:

Suffield, Alberta, is situated approximately 40km northwest of Medicine Hat, Alberta. A few "large explosive events" (100 to 500 tons) were conducted at the Defence Research Board's (DRB) Suffield Experimental Station in the 1960s. On 19 January 1961, Medicine Hat citizens felt tremors in the community as a result of five tons of TNT being detonated at the station. The station director attributed this anomaly to freak atmospheric and weather conditions. At the time the DRB was testing the effects of shock waves on military equipment.

In July 1964, the Suffield Experimental Station detonated 30,600 blocks of TNT - 500 tons - to test the largest, non-nuclear, non-confined, surface blast. Placed in various sections radiating from ground zero to test the effects of the blast were targets, dummy-men, miscellaneous instruments, mines, model ships, nose cones, respirators, vehicles, subterranean chambers, shelters, tunnels, foxholes, and trenches. Several hundred people were expected to observe the blast, including 80 "official observers" and a VIP party of military and research personnel from Canada, the United States, and Britain.
