History /

Biographical:

CPR 2816 is a class H1b Hudson-type locomotive built by Montreal Locomotive Works in December 1930. Having logged more than two million miles in active service, 2816 made its final revenue run on May 26, 1960. After a complete three-year rebuild, 2816 was restored to its original specifications with external details from the 1930/40s, and re-entered active service in 2001 as a roving ambassador for Canadian Pacific Railway. [Information from Canadian Pacific Railway's website - www.cpr.ca. P.E. 28/07/09]

History /

Biographical:

During the mid-1930s the economy and popularity of light, fast passenger trains were proven in the USA by the Burlington's "Zephyr", the Rock Island's "Rocket", and the Milwaukee Road's "Hiawatha". In 1936 the CPR built engines 3000-3004, designing each to haul a lightweight baggage car and three day coaches. Before being assigned to "The Chinook" between Calgary and Edmonton, engine 3001 and its train made an extensive publicity tour of western Canada.

[Built by Montreal Locomotive Works in 1936, this class of five F2a 4-4-4 locomotives (3000 - 3004) were named "Jubilee" type in honour of the 50th anniversary of CPR transcontinental service. P.E.]

Material Details: Negative

History /

Biographical:

According to Stuckey and Bain (1996), "The Brandon, Saskatchewan & Hudson's Bay Railway was built and operated as a totally owned subsidiary of the Great Northern Railway. Construction commenced in late 1905 and by the end of 1905, less than a mile of track had been laid north of the boundary at St. John. In 1906, the remaining 68.6 miles to Brandon were laid and service commenced that year. During the Depression of the 1930s, traffic declined significantly and the entire branch was abandoned in 1936. Over much of the branch's length, the ties and rails were laid on the prairie without ballast and today little remains of the line apart from traces where there were cuts and bridges." (p. 18)

This engine was built by Brooks in March of 1883 as No. 887 and marked as scrap [by the GN] in 1937. This engine is known to have worked passenger trains to Brandon. This class of locomotive was replaced by gas-electric [power units] in 1929 but they would be used if no gas-electric was available. Engine 185 sat dead in Minot from the closing of the Brandon line until it was scrapped.

According to Stuckey and Bain (1996), the Great Northern opened its line from the US border to Gretna and Portage La Prairie, Manitoba on March 11, 1907. It was subsequently purchased in 1909 by the Manitoba Great Northern Railway Company – a wholly owned subsidiary of the Great Northern Railway. In 1926 the 76.14 miles of track from Portage La Prairie to Gretna was abandoned, with the exception of a 25 mile section from Carman to Plum Coulee, which was sold to the Canadian Pacific Railway.
