Recorder M. MacPherson Photos Roll 7 #4 (B+W)

Unit ~~188~~ 182 Level 1 (0-5cm) Location Block ~~I~~ H
+ Shovel-Shaved

Floor trowelled? ✓ Matrix screened? ✓

Features? —

Description of soil: Loam

Artifacts recovered: ~~2 rim sherds; 4 body sherds;~~ 62 unidentifiable bone frags; ~~3 flakes~~ (one very large = 7.5 cm. in length)

Other materials: ~~6 small pieces charcoal; 6 small FCR;~~ 1 possible worked stone

Remarks: The unit is located on a slope (to the south). Unit to the immediate south (#181) has contained very large numbers of ceramics (up to 20 per quad)

	Lithic	Ceramic	Bone
NW Quad	0	1	15
NE Quad	1	4	33
SE Quad	2	1	10.
SW Quad.	1	0	4
TOTALS	4	6	62

Recorder M. MacPherson Photos Roll 7 #20 (B+W)

Unit 182 Level 2 (5-10cm) Location Block H.

Floor trowelled? + Shovel-Shaved ✓ Matrix screened? ✓

Features? —

Description of soil: Silty loam

Artifacts recovered: One rim sherd; one identifiable bone; 35 body sherds; 6 pieces of lithic; 403 bone frags.

Other materials: 3 FCR.

Remarks: The highest numbers of lithic & ceramic occurred within the eastern quads: adjacent to unit 183. So possibly unit 181 + 183 unit also yield similar numbers of artifacts in subsequent levels.

	Lithic	Ceramic	Bone
NW Quad	0	4	83
NE Quad	3	14	143
SE Quad	1	14	124
SW Quad	2	4	55
TOTALS	6	36	405

Recorder M. MacPherson Photos Rl 9 #8 (b+w)

Unit 182 Level 3 (10-15cm) Location Block H.
+ Shovel Shaved.

Floor trowelled? ✓ Matrix screened? ✓

Features? —

Description of soil: Clay - silt blend

Artifacts recovered: Radius; ulna; T.D. bone; 26 body sherds; 11 pieces of lithic.

Other materials: 4 FCR.

Remarks: The higher bone count has occurred within the western quads (as opposed to the eastern quads in level 2.) However, the lithic & ceramic totals within the eastern quads surpass those within the ~~western~~ western quads (2:1 ratio). The root disturbance esp at the SE - at the west could be a factor responsible for this concentration along the eastern quads.

	Lithic	Ceramic	Bone
NW quad	3	4	132
NE quad	3	9	83
SE quad	5	9	~~59~~ 66
SW quad	0	4	110.

Recorder M. MacPherson Photos Roll 8 #19 (B+W)

Unit 182 Level 4 (15-20cm) Location Block H

Floor trowelled? + Shovel shaved Matrix screened? ✓

Features? —

Description of soil: Clay silt blend. At the bottom of level 4, I noticed an isolated patch of grey soil (adjacent to the SE bulk). Ash? It did not continue beyond depth 5 cm. Diam = 1 cm.

Artifacts recovered: 11 body sherds; 3 pieces of lithic; humerus; skull frag; ulna; 6 other I.D. bone

Other materials: Ismall FCR

Remarks: The concentrations in artifacts in level 3 along the eastern wall no longer applies at level 4. This could be accounted for by the natural slope of the unit. The southern quads (the SE in particular at level 3 had highest lithic & ceramic totals) are now entering into clay.

	Lithic	Ceramic	Bone
NW Quad	0	4	151
NE Quad	2	4	123
SE Quad	1	0	100
SW Quad.	0	3	79
TOTALS.	3	11	453

Unit 182 Level 5 (20-25cm) Location Block H.

Floor trowelled? ✓ Matrix screened? ✓

4-Shovel-Shaved

Features? —

Description of soil: Clay.

Artifacts recovered: 3 body sherds; 1 flake; phalanx; horn core; cranial frag plus 3 T.D. bone.

Other materials: 2 FCR.

Remarks: Concentration of artifacts along north wall (consistent with that of level 4). This may be accounted for by the fact that the north wall is the highest point of the unit. (most removed from the clay level).

	Lithic	Ceramic	Bone
NW Quad	0	2	80
NE Quad	0	0	69
SE Quad	1	1	14
SW Quad	0	0	16

Unit Summary Record

Site No. DjLx-1 Unit No. 182 Levels Excavated 5

Depth from Surface 25 cm. Depth from Datum —

Excavator(s) M. MacPherson Date Aug 25/88.

Excavation Method(s) Shovel shaving; trowel.

Summary Deposits (vertical profile on back)

Summary of Disturbance Large hole in SE quad left by large dead tree root. Large rock bordering the SW & NW quads.

Summary of Recoveries: 3 ~~bodies~~ rim sherds; 79 body sherds; 25 pieces of lithic; cranial frag; 11 other identifiable bone; radius; 2 ulna; humerus; skull frag; phalanx; horn core

Photo (Ref.) Roll 8 #23 (Level 5).

Feature (Ref.) —

Remarks: Unit located on a north-south slope. Highest point of unit was at north wall. Greatest concentration of artifacts (levels 1-3) at eastern wall. For subsequent levels (4+5) accumulations occurred along north wall.
