1916.

THIS is a stimulating and thought-provoking little book. It is not a dogmatic treatise, but a series of Facts and Figures, Quotations and Queries, Suggestions and Forecasts, arranged in the twelve chapters, mentioned on the next page, in such a way as to be helpful to individual enquirers and Study Circles in considering what will happen after the War with regard to Trade, Employment, Wages, Prices, Trade Unionism, Co-operation, Women's Labour, Foreign Commerce, the Railways, the Coal Supply, Education, Taxation, etc.

The approach of Peace is causing every serious-minded man and woman to ask the question: "What is going to happen in Great Britain after the War?" Never has this country had to face social and industrial problems of such magnitude. We ought all to do our best to get clear ideas about them. This little book has been prepared to help the student to think for himself.
